Thread: [Strict Reputation Characters](#)

Omniscient - March 25, 2015, 9:20 pm

Just like thread titles I have created a plugin to prevent special characters in reputations.

No more annoying rep comments that screw up the rep page.

Enjoy.

Canon - March 25, 2015, 9:21 pm

God bless you Omni. No more little assholes fucking up the rep page.

brian188246 - March 25, 2015, 9:21 pm

Good to see this implemented, will this filter out ones that are already in the system?

Som??od? - March 25, 2015, 9:21 pm

Thank you so much. That was really starting to get annoying.

Juice WRLD - March 25, 2015, 9:22 pm

Enjoy.

Is that also for usertitles as well? Just curious.

G???????f????s? - March 25, 2015, 9:22 pm

Finally jesus christ, Pisses me off when people do that. They're so fucking stupid

Hydra - March 25, 2015, 9:22 pm

Glad this got implemented, it was suggested a few weeks ago. So I assume preset reputation will not be created?

arlington - March 25, 2015, 9:23 pm

Atleast we can now read what the person above is saying..

Impoofpooh - March 25, 2015, 9:26 pm

Well thats good. Fucked up things do not sound to great.

Omniscient - March 25, 2015, 9:27 pm

Quote:Good to see this implemented, will this filter out ones that are already in the system?
This plugin won't do that but I'm considering running a script against the database to do it separately.

The reputation table is 300Mb with 1.7 million entries. I have to see how realistic it is to do it.

Quote:So I assume preset reputation will not be created?

That's not an immediate concern.

Viral Dragon - March 25, 2015, 9:29 pm

Thank God. That shit is probably some of the most annoying things I've come across.
Please do this for usertitles too. ._.

-Viral.

Envy - March 25, 2015, 9:50 pm

(Mar 25, 2015 09:29 PM)Viral Dragon Wrote: [\[CITE\]](#) Please do this for usertitles too. ._.

-Viral.

I disagree. It might as well be done for usernames too if that happens because I've seen people with the same annoying characters in them. Annoying usertitles/names that make the site look a mess and break lines or pages could be bundled in with profile violations/usertitle rules so they can just be reported and staff can take action if needed?

Ooze - March 25, 2015, 9:52 pm

(Mar 25, 2015 09:50 PM)Envy Wrote: [\[CITE\]](#) I disagree. It might as well be done for usernames too if that happens because I've seen people with the same annoying characters in them. Its super annoying and blocks some text and i can never PM them.

ViN - March 25, 2015, 9:53 pm

Another fine release. Quite annoying to see people use those special characters that get in the way of everything. You're on fire today, Omni. ?

240sx - March 25, 2015, 9:53 pm

Loving these updates, thanks Omni :D!

Ahri????? - March 25, 2015, 9:57 pm

Good now people can type in proper English, none of this black magic flying off the page.

Omniscient - March 25, 2015, 9:59 pm

I don't see doing this for usertitles because special characters are genuinely used for customizing of their own account. In reputations though it's used to annoy.

I know some special character usernames create odd issues but I don't have the time to narrow them down right now. I'd probably spend hours on it and just not sure it's worth the effort. It might even break things for users with these characters.

Indecisive enough - March 25, 2015, 10:01 pm

Someones on a roll today, pretty cool to seeing new features being implemented.

Mr.Peanut - March 25, 2015, 10:05 pm

(Mar 25, 2015 09:23 PM)xadamxk Wrote: [\[CITE\]](#) Omni is on a mother fucking roll today.
Shit. Someone give this man a medal xD

I thought it was just me who's noticed this (thread wise) didn't want to say anything at first lol.

Vaksar - March 25, 2015, 10:06 pm

Finally, that was getting pretty annoying.

Great to see this new update to the rep! ?

AnonNinja - March 25, 2015, 11:53 pm

Omni is now on fire, these upgrades are really good :D

adampelletgun - March 26, 2015, 12:08 am

I'm glad to see this added.

Such characters were very annoying.

Anoncat - March 26, 2015, 12:17 am

i guess it is great, sadly i can't give rep :(

Fintastic - March 26, 2015, 12:19 am

If this is for the fucking piles I'm so happy.. I can't understand what is the meaning for those piles

Raptor. - March 26, 2015, 12:25 am

Oh thank fuck. This was so needed, so very needed. Thanks a bunch.

LessThan3 - March 26, 2015, 1:57 am

Another good implementation. Getting shit done recently. If only MyBB's rep system wasn't still stupidly balanced.

Martino - March 26, 2015, 2:01 am

Thanks for getting this done . Great timing .

DLT. - March 26, 2015, 2:03 am

"Working Hard"

You sure are. Keep it up, all features recently implemented have been great.

Buba Corelli - March 26, 2015, 3:08 am

Thanks for doing this, I came across few annoying reputation pages.

Illuminati? - March 26, 2015, 3:08 am

I appreciate it.

That shit was super annoying.

Effexion - March 26, 2015, 3:23 am

Finally. Thanks, Omni. Now we won't have to endure the floating characters noobs do thinking they're Kevin Mitnick.

muzzy. - March 26, 2015, 5:54 am

My reputation has changed, a few neutrals / negs have vanished. Are these things related?

ha4x0r - March 26, 2015, 5:59 am

Maybe should be implemented for user titles etc too.

?Saadi - March 26, 2015, 7:07 am

Finally, so much for that crap ?

Aceman - March 26, 2015, 7:53 am

Thank you for this, I hated seeing those stupid characters that would stretch across the whole page.

Declan? - March 26, 2015, 7:55 am

Thank God (or Omni). Will this also disable invisible characters? I've seen so many reps that are just blank.

Patrick Jane - March 26, 2015, 7:57 am

Good update! So what happens to the current reps that has those characters in it?

Roger Waters - March 26, 2015, 8:22 am

(Mar 26, 2015 07:57 AM)Patrick Jane Wrote: [\[CITE\]](#) Good update! So what happens to the current reps that has those characters in it?

I believe they stay there but those characters just don't show up. That is what happened when he blocked some characters from being in the thread titles and the threads stayed there without those special characters. I don't know of anyone who has received those reputations off the top of my head, but if I come across someone who did then I'll let you know.

Thehackerguy1 - March 26, 2015, 8:23 am

Thanks sir, finally people will not post the bad face symbol anymore ?

ZuGgY - March 26, 2015, 11:14 am

The annoying character that goes up the page from the comment is probably the most annoying one.

Thanks for the update.

Omniscient - March 26, 2015, 11:20 am

Quote:Will this also disable invisible characters?

It will prevent them in the future. I have not yet decided if I'm going to do the work to retroactively filter reps.

Sir - March 26, 2015, 12:22 pm

Nice, I was waiting to see this happen. Now we just need to disallow special characters in usernames as a whole to avoid any confusion or clutter on the page.

c??? - March 26, 2015, 2:54 pm

Great update. Thank you, it was getting annoying.

Shxtdown - March 26, 2015, 2:57 pm

Woo. It was extremely difficult to see the reputation above with the annoying special characters. Thanks Omni.

Savoy - March 26, 2015, 3:07 pm

This is actually very nice to have. All I can say is thank you.

The Judge - March 26, 2015, 3:55 pm

What about existing rep comments that screw up the rep page?

I have one and I do find it very annoying.

Savoy - March 26, 2015, 3:58 pm

(Mar 26, 2015 03:55 PM)The Judge Wrote: [\[CITE\]](#) What about existing rep comments that screw up the rep page?

That's already been answered buddy :)

The Judge - March 26, 2015, 4:03 pm

(Mar 26, 2015 03:58 PM)Savoy Wrote: [\[CITE\]](#) That's already been answered buddy :)
Oh my bad, thanks for answering my question bud.

mrnapolean1 - March 26, 2015, 4:27 pm

Thank goodness. I get tired of seeing garbage messing up the reputation page.

webdev77 - March 26, 2015, 4:59 pm

Thank you. A feature that has been long overdue.

SIM-1676753 - March 26, 2015, 5:35 pm

I have posted special characters on reputation pages of other users before, though I am glad that this is implimente.

Comedic - March 26, 2015, 6:20 pm

Oh man you can't imagine how many of these I've seen. So annoying..

mrnapolean1 - March 26, 2015, 6:36 pm

Now does this affect the posting of smiles?

I do like to include a smile in my rep comments.

mrnapolean1 - March 27, 2015, 6:35 am

(Mar 26, 2015 07:03 PM)xadamxk Wrote: [\[CITE\]](#) Nope, smiles still work for me anyways.
Take a look:

<https://hackforums.net/reputation.php?uid=1061181>

Thanks!

I was hoping this new policy on special characters didn't affect smiles.

Jake Miller - March 27, 2015, 6:36 am

Thanks god this was implanted, i hate viewing someones reputation and i can't see what people write because someone used theese chars.

?lien - March 31, 2015, 5:46 pm

This is a welcome addition. No need for lengthy rep comments, really. Nice improvements on the site lately; really digging it!
