Thread: [\[PS6\] Flags/Spikes through Text](#)

James Threewell - March 26, 2015, 5:32 pm

Saw a post asking how it was done, decided to try it out.

Take your text, angle it how you wish.

Then use the Lasso tool in polygon mode and make a triangle.

Erase the inside part of the triangle, then with the same tool, use "subtract mode" and go about, half way through the triangle, all the way around the top portion.
Once you do this, you'll fill the part in with the same color.

Deselect everything and clean up the back edges.

Finished product:

(I bugged up the angles because I was testing on the "Hex" and demonstrating on the "Hax"

very beautiful this text my friend?

CaptainGhost - April 1, 2015, 5:23 am

good tutorial thanks for sharing :)

Mattixio - April 12, 2015, 8:01 am

Thanks for sharing you could do pretty cool stuff with this!

-Rarity- - August 6, 2015, 6:05 pm

Looks like nice tutorial :)

Gnome Kek - August 11, 2015, 7:19 pm

I will be using this often thank you!

Exchange.Service - August 17, 2015, 1:07 am

beautiful font!

great tut

chivas908 - August 17, 2015, 3:40 am

Good tutorial, thank you very much :)
