Thread: [Testing some new attack methods \(Layer 7 + Layer 4\). Give me some targets!](#)

High-Res - March 26, 2015, 7:32 pm

Hey everyone,

Testing out a few new attack methods. Mostly L7, but there are one or two Layer 4 things I want to try out. Throw me some of your websites or w/e for me to hit :)

EDIT: I'm only looking for things that you PERSONALLY own. This is not a free ddos service.

Zero_Luffy - March 26, 2015, 7:35 pm

OK, i inbox u something, try to see if u can put it down :)

If your still interested I have a personal node, I would love for you to hit. I have been working on a new configuration to help my node handle the stress. PM me if you are still interested.

Hey, Can I get in on this? I could test you and you could graph me?

I have some lists and some bots I'd like to try out

Mainly, NTP and CHARGEN, maybe some SSDP?
