Thread: [Taskdialog, make your messagebox more awesome](#)

DeStilleGast - March 27, 2015, 8:49 am

Yes I know, I can't make good titles

but this thread is for a new source that I haven't seen here, and maybe you guys like it.

Preview: puu.sh/gRKFN/ba284d7f21.gif

Get the module to create this here:

mediafire.com/view/u67841881u78rmg/TaskDialog.vb

How to use it:

To call the new messagebox use `TaskDialog.show()` this will return a `TaskDialogResult` back

You can use 1 button, if you want to use more buttons use `Or` and not `And` this will not work. you can also see it in the example

Example ([Click to View](#))

```
Dim result As TaskDialogResult
```

```
result = TaskDialog.show(Me, "Wana close this application", "Are you sure ?", "To close this application click on OK", TaskDialogButtons.OK or TaskDialogButtons.Cancel, TaskDialogIcon.Question)
```

```
if result = TaskDialogResult.Stop then end
```

Still unable to post links and pictures, did I miss a update ٧٧

Because I could first place links, like my watermark program

P.S. This is also been used in my new GIF recorder, its almost finished for release :D

Very nice, I made a class for this once. Didn't really post it though. There are so many things to customize in these TaskDialogs, they are awesome.

Great job with this OP! I think this will come helpful to a lot of people, maybe even myself. Thanks! ?

nuk - March 27, 2015, 11:55 am

This is actually a very nice HQ share ;) Great job on this OP and thanks for sharing :) Enjoy +3 green from me ;) ...Keep up the good work/shares ;)

SaketSaket - March 27, 2015, 12:18 pm

Even though this is very small but it's very good... Keep coding & keep sharing ;)

Rhez - March 27, 2015, 4:30 pm

I cant view the image with link :(
BTW awesome share.

TazzyOpz - March 27, 2015, 10:05 pm

I love the look of it.. Looks very clean.. Nice share :)

Why did no one pastebin this earlier?

I have no idea, wasn't thinking about that XD

Cant even reply with links, its f**king annoying
