Thread: [HF Username Glitch \(Get any username\)](#)

Fr?sh - March 27, 2015, 3:45 pm

Hey guys I hope this is in the right section

So to get a 3 character username (or any username you want) you have to copy and paste and invisible character

Go to this google search and copy on the address bar where it has the letters OBJ with a box around it [LINK HERE](#)

Copy that and put go to user CP. Click change username and paste the invisible character

Then put whatever name you want like God or something

I hope this helped even though most people might know this ?

This is going to be fun when you have to login again.

you can use your email to login instead of your username

Oliver Sykes - March 27, 2015, 3:49 pm

Or you could just log in with an email.

Shxtdown - March 27, 2015, 3:49 pm

Would this not count as breaking the rules since it's bypassing the three character limit? Whatever though, pretty cool. Must be annoying for group leaders when adding you in a group unless they just copy and paste (as many have told me about my username) ?

?Creative - March 27, 2015, 3:49 pm

Thats how people do it huh never knew that. With my username all i do is log in with my email its easier than having to copy and paste especially when i log on on my phone

I mean it's technically 4 characters and people use weird characters like that haha

Arcanine - March 27, 2015, 3:54 pm

I am loving my username. Brb changing it back.

Comedic - March 27, 2015, 4:06 pm

Oh yeah I remember this. I might do this in the future, thanks for the reminder :D

Looks like they disabled the feature to do this on this forum. Soo, to end this sentence.. Your theory is now flawed and useless.

You can always add a period to the end of the username that you want, as suggested above.

Fr?sh - March 27, 2015, 6:56 pm

Well I try to help in some way and I get -9 for the same reason so i'm closing this

Sorry I tried ?
