Thread: [Sales Tag Beta Released](#)

Omniscient - March 27, 2015, 4:57 pm

<https://hackforums.net/salestag.php>

Currently for Ub3r only while in beta. Likely 3P1C will be added before L33t.

Price while in beta is \$10 OMC and is subject to change without notice.

More images will be added. Some of the images may potentially be removed.

Sales Tags do not expire. Once it's purchased it's part of your thread.

Your thread must be under the Marketplace category.

Be aware it's currently setup so that you cannot update the Sales Tag even if you buy another one. This might change and I might give discount for update. I'm going to wait and see how this goes before I take that next step.

The ordering system should be Tamper Data proof. I have all checks for security correctly in place. Or so I believe.

Honestly I'm not interested in hearing complaints about how it looks. I spent a lot of time on this. I'm happy to make adjustments but after all the work I did, this is here to stay.

If you have any problems feel free to post in this thread or PM me. However the system should be setup pretty idiot proof. One of the best GUI I have done for HF. It's very thorough error checking. This is a set-it-forget-it feature for me.

Any questions?

Thanks for the update.

Autocorrect - March 27, 2015, 5:01 pm

I love it. I'm buying one today or tomorrow for a sales thread that's going on. Thanks for the update!

Tonight - March 27, 2015, 5:01 pm

I feel as if members might abuse their tag, i.e. changing the title and OP of a thread after they sell a particular item and re-using the thread for another.

Is there a way to prevent this, or are you okay with that?

Dean Winchester? - March 27, 2015, 5:02 pm

Does the sales tag actually have to tell the truth?

I'm not selling anything right now, but I think it'd be annoying if every single thread has a big red "Best Offer!" in the title ?

Nature - March 27, 2015, 5:02 pm

Seems like a great feature that has been added to the marketplace.

And hopefully it can add some activity to OMC too.

labroca - March 27, 2015, 5:04 pm

This is going to be great, surprised at the fact it doesn't expire, seems pretty flashy.

The "view new posts" is usually older, popular posts (which are usually stickies and will have this), so it's going to be crazy colorful all the time.

Makaveli. - March 27, 2015, 5:04 pm

These are pretty cool, appreciate the work. ?

TRH4CK - March 27, 2015, 5:06 pm

Nice!

Don't forget to either add this to the Extra page or something in the marketplace so that we don't lose the page xD ?

Omniscient - March 27, 2015, 5:07 pm

Quote:changing the title and OP of a thread after they sell a particular item and re-using the thread for another.

I didn't think of that. :(

Not sure it will be a problem because the thread replies won't be related. I have to think about that and also see if it does indeed become a problem. If so I may have to set an expiration date on these. More hassle but I'll try to address abuse.

Quote:Does the sales tag actually have to tell the truth?

Best is relative term so it can't be untruthful. I'm going to do my best to select words in the Tags that can't be falsely advertised.

Quote:I'm not selling anything right now, but I think it'd be annoying if every single thread has a big red "Best Offer!" in the title

Honestly I can't see that every thread in the Marketplace is going to pay for this. Yes, you'll see more than a few but I can always make it more expensive if it's really flooding the Marketplace. Just like I do with sticky prices.

Shxtdown - March 27, 2015, 5:09 pm

Say you had an e-book titled 'make \$1000 an hour' and it was labelled with 'guarantee', some users may confuse these as official guarantees. The actual tags look awesome though, good job Omni.

Ahh. Just curious because I remember when you implemented ub3r only for the online accounts section l33t members were editing their previous threads in those sections and just using those to

sell.

Obviously you can just report them but if there was a way of preventing those without staff interactions, that would make life much easier.

Maybe two week tags for \$10 OMC and never expiring tags for, say, \$30 OMC. That would ensure only serious sellers are getting the benefit of the doubt.

Gustav - March 27, 2015, 5:13 pm

Why does this thread <https://hackforums.net/showthread.php?tid=4747272> still have a tag?

Pseudonymous - March 27, 2015, 5:14 pm

Hey Omni whose sales tags design won?

Omniscient - March 27, 2015, 5:15 pm

Quote:Don't forget to either add this to the Extra page or something in the marketplace so that we don't lose the page

When I'm 100% sure it's working and it's out of beta then I'll do that and probably place a Marketplace Discussion sticky too.

Quote:Say you had an e-book titled 'make \$1000 an hour' and it was labelled with 'guarantee', some users may confuse these as official guarantees.

Members already put most of these terms into their titles. I don't see the Tags causing conflict but if it does I'll review the tag text.

Jason™ - March 27, 2015, 5:16 pm

I noticed it says "You can only purchase for your own thread and it must not already have an existing Sales Tag. Sales Tags do not expire."

Is this stating that once you purchase a tag, you can not purchase a new different tag at another time for the same thread?

Drizzy?? - March 27, 2015, 5:17 pm

Is it automatically applied to the thread, or is it manual?

AMC - March 27, 2015, 5:17 pm

From what I have seen they look quite nice and you have obviously put some effort into it. They bring more color to the forum and are obviously a good tool for sales.

?Saadi - March 27, 2015, 5:18 pm

Do the sale tags also get deleted once the thread is junked?

Very nice update, by the way. ?

(Mar 27, 2015 05:18 PM)?Saadi Wrote: [\[CITE\]](#) Do the sale tags also get deleted once the thread is junked?

I would assume so, how would the tag be there if the thread isn't?

Omniscient - March 27, 2015, 5:19 pm

Quote:Is this stating that once you purchase a tag, you can not purchase a new different tag at another time for the same thread?

Correct. At this time the order page will error if you try to buy a tag for a thread with one already. That could possibly change but to be fair I may offer a discount if the thread does have one already.

Quote:Is it automatically applied to the thread, or is it manual?

Entire process should be 100% automatic. Go through the checkout, make the OMC payment, and when it confirms it will apply the Tag to your thread.

Jake Johnson - March 27, 2015, 5:21 pm

This is an awesome idea thanks for implementing it.

It will definitely help me out on my new products I will be selling soon. :)

Miki - March 27, 2015, 5:21 pm

Good job, looks nice hopefully you will increase price as more people will buy. Also price increase will help you pay for site upgrades and keep it going, best update of 2015 so far.

Add a system to transfer tags for a small fee or change your tag name?

I personally don't think that there should be a discount if you were ever to implement this.

People will most likely be purchasing these tags to get more sales directed towards their product, which means

more income for the buyer (maybe). I don't see a need for a discount.

I do however think that you should be able to purchase a new tag at any time for your thread. If a person is wanting to purchase a new tag to spice the thread up a bit, I don't see it hurting

anyone or affecting anything, was there a specific reasoning for this?

Thanks - just trying to figure out a few things.

He said that as of right now there can only be one tag per thread.

Edit: Actually, this would be a cool idea.

To add to this, instead of purchasing one tag would it be possible to get an option to have all of them (for more money of course) and swap through them like this?:

Because I initially didn't want someone to buy a tag for a thread that's not theirs. Because potentially with Tamper Data you could do that and nothing I can do will stop that. So someone could pay the OMC to change your tag if they really wanted to do it. I couldn't stop it.

When a person is selecting the tag that they want to purchase, or in the final step, would it be possible to grab the person's UID and submit that somewhere when it's purchased with the link of the thread that they purchased a tag to?

If this or something similar is possible - it could prevent abuse greatly.

I already do that. Tamper data would allow you to change it when posting to Coinpayments. Nothing I can do will stop that.

What if a unique address is generated when you try purchase a tag?

I highly doubt anybody would go through the effort of trying to find the exact unique address just to give you a tag.

Obviously the purchase tag button will be in the edit page so only you can click it.

EDIT: Just to clarify, you log the address and the thread ID, only if those two things match when the payment is made will the purchase work.

The Illusionist - March 27, 2015, 5:39 pm

Great update, I just have one question though. Will we ever be able to set a price on the tag? For example a tag saying "20\$" or "Sale 20\$" where you can edit your own price.

Thanks,

Omniscient - March 27, 2015, 5:40 pm

Technically I guess I could create an invoice before it's sent to CP and save the data. Then check it upon completed purchase.

I plan to do a full invoice system for Stickies and automate that whole process too. This plugin (Sales Tag) is going to make a great base to work on that.

So maybe in the future I can make the correct alterations for that. We'll see.

Yeah I was suggesting something that was sent before initial payment, but then again if the person doesn't complete the payment there is no need for the verification message (UID/THREAD) to be sent out somewhere, and you're right about the Tamper Data.

If you're still up for suggestions on this topic, I will try and come up with a few for this.

Okay, technically not 100% automated but I'd let members create the invoice. I'd approve/deny the invoice. They would have X hours to pay otherwise invoice expires. So the only thing I would be doing is approving and denying stickies. So much less than what I do now.

More OMC stuff coming too.

At \$10 I don't think as many as you think will buy them. Heck even at \$5 I don't think that would

happen.

Quote:Omni won't leave the price low like that.

If the demand goes up, then price will go up.

Exactly. I'll be happy if 2-5 threads on the first page of results have them. If it becomes 10+ then I may need to make changes. If something is oversold then it's underpriced.

Quote:I don't think Top Seller should be an available tag for purchase.

Maybe. I will take into consideration how the text might negatively effect members and adjust accordingly. What I might have is a "safe" icon that if one is removed then all the threads using the removed icon will resort to the safe one. I will need to write up a small TOS before this comes out of beta anyways. Likely going to be a full Help Doc.

I'm also considering doing this for PP but a discount for OMC. At least then I'll make some money from this. Whenever I accept OMC for a feature I'm actually losing money.

Absolutely love this new feature. I'm not UB3R, but I will buy 3P1C in a heartbeat when it's released for them. Looked through every page of this thread and saw talk about doing an invoice system potentially allowing other members to buy it, that would be great since my partner is UB3R, though I'm sure that feature is far down the list, and it will probably be available for 3P1C by then.

I have not seen you mention a time frame for out of UB3R release? So do you have an estimated time frame for 3P1C, such as 1 week or a few months?

EDIT:

I am I'm favor of making it more expensive, but as you said, time will tell if it gets overbought.

I also agree with making a time limit, forever is well, forever... Especially when you add more tags, people may want to change there current one to a newer one that fits them better, a expiration date would allow this.

As for adding a PayPal option, I would prefer that even if it costs more. Currency can be a pain sometimes, but if that's al you'll offer I'm completely fine.

I'm fucking special!

But anyways.. They are a great addition to the forum and it gives threads more attention for potential sales.

But I have to ask... Why my thread is Guarantee? O_O

But I felt so fucking honored receiving this before the release.

Very neat implant omni.

But I think you should go with the basic tags.
The tags with the stars and flames look a bit tacky, like others said.

For example, use either one of these tags as the model for all of them.

And maybe just change the color for each word.
i.e ; HOT would could have a red background.

There would be a lot of problems too. If we want to add a discount and want to let people know then we won't be able to change the title. I guess its fine.

For some reason this gives a trashy look to the marketplace. Idk it just seems like too much. Maybe make it a bit more exclusive on who can buy it. For now you have to just wait till your thread is unstuck and back in circulation. I might write in the exemption for paid stickies but I have to believe that if you already have a paid sticky that you already have good marketing.

Quote:You should make it so after yu buy a tag the thread title can't be changed. I could just buy a

And why should that matter?

And that's important to get more of the community involved in not only cryptos but OMC too. For everyone I can get to have a wallet or Bittrex account I consider that a point in the win column. I would love it if we had 1/2 of HF using OMC. And if you're new to Crypto Currency this is a great time to learn.

I mean, I think they look cool, but I don't really understand the meaning behind them. I mean sure, you can say that they're a "Hot-Seller" or a "Guarantee" but just because a little PNG says that doesn't mean I'll buy it over another product, but I don't use the marketplace that much so I really don't understand it. Also, I could see a new member that doesn't understand the whole thing could see this as a "HF Vouched Product" since it has like "Guarantee" on it.

Omniscient - March 28, 2015, 12:17 pm

I think if HF had an inventory system like steam that would allow users to buy the tags and save them for later-use, then when they create a thread they could select the tag they'd like to use on that thread etc. it would be much better.

Also if the tags were to be sold in limited quantities, I feel that would make them rare and raise the value as well as keep the OMC economy going specially if there was a way to trade tags with other users from the community.

Then members could maybe create there own and pay Omni a submission fee to have them featured etc. in exchange they can get like OMC royalties or something. :3

Fleckens - March 28, 2015, 1:31 pm

So true. #1 seller or best deal should be exclusive.

Moeseph - March 28, 2015, 4:05 pm

I suggest treating them like stickies, don't see why they shouldn't be. They serve the same purpose.

Vuln - March 28, 2015, 4:46 pm

I think it would a nice addition to the marketplace if the tags were exclusive/special, but I'm guessing that all crypter/RAT sellers (etc.) will soon be purchasing Sales Tags for their sales threads, with

tags losing some of their meaning in return.

But of course that's something that cannot be avoided with automated approvals. The tags themselves look great, though. Simple and clean designs. And more money towards HF is always a good thing.

May I ask why you chose to implement this?

It'd be cool if group owners would pay a one time fee of \$x.xx amount of money to you in regards to having a tag made for their group which has to be named after there group, which they can put on any threads they desire (Official Sale threads brought to you by the group).

tweety - March 28, 2015, 6:19 pm

Really like the idea behind this, gives OMC more value on HF and will increase trading. I really think you should increase the price to like \$50 or so, the tags are huge eye catchers, most long term

marketers know what I'm talking about. At the moment they seem really cheap and a lot of people would be able to invest into them, it'll flood the section. That would hurt the feature itself if every thread has them too. Just my opinion at the moment, but seems great. Will you be implementing an auto buy feature for this or do it manually like the stickies?

NoodleBot™ - March 28, 2015, 6:28 pm

I don't like #1 seller one because it implies too much.

Just like how a sticky is purchased and Omni must post his uninvolved there should be the same post/behaviour towards these tags.

tagid

txid - random string

And then send the txid to coinpayments, and then when the ipn comes back you can just check the txid against tempTagTX and apply tagid to tid if tid is owned by uid.

I removed tags like Guarantee and #1 Seller. Those probably do create a sense of false advertising.

Just an idea here.

To help with the growth of OmniCoin further, you should say people could make some for 1-5kOMC. I can see that helping it grow a little bit, and it takes work off you.

It would be coolio if you just remove the tag from the people who already purchased it so they can buy another one :(

The other one it was switched over to s0cks

Just give me a change request and I'll manually set it.

So wait, you can also have it on threads outside of Marketplace?

Always wondered though, what if I purchase it for a thread that's in Marketplace and I decide to sticky it in non-marketplace part of the forum, will it stay there for good or it's being automatically removed? Some look really good, wouldn't mind grabbing one up.

You can only get it on threads in the Marketplace

If you buy the tag before your thread is stickied in another section the tag will stay ?

Seems stupid as people will just ignore the sales tags knowing that it's paid for advertising and of no real meaning.

This may be true, but it gives OMC a base price which is the point of this, OMC doesn't have a purpose on this site "yet"

NiktoKan - March 29, 2015, 9:56 pm

I have an idea. Those who sell their product at OMC Exclusives Market will get discount price for sale tag. The aim is encourage OMC transaction between members.

Datageni - March 29, 2015, 10:46 pm

This looks awesome. Good job on this, Omni!

The GRim - March 29, 2015, 10:50 pm

No offense but this looks so unprofessional.

If a thread reaches 2000 replies and gets locked while you have a sales tag, can it get carried over to a secondary thread or do you have to purchase another tag?

Omni answered this previously I believe. Sales tags won't be transferred over, so you'd have to purchase a new one.

You're right, I just stalked Omni's posts and found it.

'BlackBone - March 30, 2015, 3:59 am

it will be an awesome idea if the text on the tag can be customized

Not new members who are usually the ones who fall for e-books and other products.
