Thread: [\[FREE\] FTP Spreader v1.0 \[HOT\]](#)

📅 - June 11, 2010, 6:50 pm

What is it?

With this you can make redirection to your infected file using your stolen FTP. You can spread a lot with this! =D

How to use it?

1) Download and extract the archive.

2) Make a new .TXT with your stolen FTP like this :

=> <ftp://username:password@ftp.yourstolenftp1.com>

=> <ftp://username:password@ftp.yourstolenftp2.com>

=> <ftp://username:password@ftp.yourstolenftp3.com>

=> ...

3) Edit index.html & index.php with the link to your infected file.

3) Open FTP Spreader v1.0.exe.

4) Browse to FTP List.

5) Click on "Start Spreading" & enjoy! ?

Nice job!

I don't think I have ever seen an FTP Spreader before.

I am definitely going to check this out.

Will give feedback :D

Thanks for testing this man. If you have idea for a possible next version, tell me. :]

nightkid411 - June 11, 2010, 7:03 pm

Look's Nice But I dont Think I need this

Hecker21 - June 11, 2010, 7:05 pm

How is this hot if it only has three responses?

Looks good though.

Morse Code - June 11, 2010, 7:05 pm

I haven't seen any stolen FTP lists but good idea

nightkid411 - June 11, 2010, 7:07 pm

I think Just Google Ftp Password List

It will be hot. ?

DykeroSoft - June 11, 2010, 7:08 pm

I got a bot on my BlackShades server from this already.

I was right :D It was a nice share.

Good work, hope to see future releases! :)

It's a good idea. I love using dorks on google too. You can find a lot of things. ?

Ischyros - June 11, 2010, 10:04 pm

brilliant idea, nice work. I may use this some time...

:D

thanks for sharing dude nice job

chopsticks - June 11, 2010, 11:12 pm

Any more feedback on this?

hacphongthan - June 12, 2010, 1:46 am

how it work?

auto infect to html or what method ?

Joseph Ducreux - June 12, 2010, 1:47 am

does it have download features aswell? worm like downloader capabilities?

A FTP List is a list of stolen FTP with adress, user & pass.
You can use a stealer or a keylogger to get some.

It's only using redirection. But maybe in a future version it will use html/php infection or
java/activeX...

worm like downloader capabilities?

It's not a worm. You can edit index.html & index.php with the link to your own worm...

Although I won't have much use for this, I just wish to say that It's a nice little tool Indeed.
Great contribution mate.

TL - June 12, 2010, 5:45 am

No problem. Give ideas if u have some. =)
