Official Hackforums Sales Tags

It's been a while since I posted anything in this section.. So I figured, why not..
The old sales tags I made for HF needed improvement, so I made some new ones.
I will most likely create more styles in the future, so feel free to suggest tags you'd like to see.
Maybe certain colors you feel will work well on HF.
Any suggestion regarding graphics can be taken into consideration.

Of course, you're also free to comment on the current tags, as seen below:

This new feature and Omni's official statement can be discussed [here](#).

g0han - March 28, 2015, 4:38 pm

They all look great, have the other star ones been removed?

Designer - March 28, 2015, 4:42 pm

Thanks. All current active tags can be seen (and purchased) here:

<https://hackforums.net/salestag.php>

Some of the old(er) tags are still available.

Darkwin - March 28, 2015, 4:50 pm

They're awesome i just wished they'd have different icons instead of the repetitive star etc.

You did an amazing job though.

Thank you. Any icons you have in mind?

Do you feel like there should be icons that match the text (so roughly 18 different ones) or maybe multiple sets with 18 of the same icon per set?

Obli - March 28, 2015, 5:00 pm

Simplistic shapes with text and a light drop shadow, not much to rare tbh.

labroca - March 28, 2015, 5:01 pm

This is awesome, I really hope Omniscient decides to use these.

There should be a feature to turn them off though, they may make the forum look like one of those spammy award sites.

(Mar 28, 2015 05:00 PM)Obli Wrote: [\[CITE\]](#) Simplistic shapes with text and a light drop shadow, not much to rare tbh.

They shouldn't be too dramatic, there will be a lot of them..

Hopefully they could match the theme better though.

(Mar 28, 2015 05:04 PM)beslim Wrote: [\[CITE\]](#) I like it a lot, it's clean and very sophisticated and it enhances this forum very nicely.

I could not have said it any better myself c:

I feel like these tags need to be earned or somehow verified, saying you're the #1 seller in something is really just spam.

I feel the shapes and vibrant colors with a text that sticks out just enough works well for this feature. They should stick out enough to grab the user's attention while maintaining a clean look ;)

Please read the official thread by Omniscient (bottom of my thread). These tags (along with a few others) can already be purchased for your own thread(s).

Please discuss the actual feature here: <https://hackforums.net/showthread.php?tid=4750160>

(Mar 29, 2015 07:22 AM)beslim Wrote: [\[CITE\]](#) Why didn't you make your tags transparant? I can see people using them and when I hoover over their thread title I can see it not being transparant.

The new ones in this thread? Omniscient required them to be .gif's. All tags have a light shadow with a matte #333 outline (instead of white). The shadow causes a slightly thicker #333 outline when you hover and the background changes.

Travs - March 29, 2015, 9:23 am

these are too good for this site you're still a cunt

Huebert - *March 29, 2015, 7:10 pm*

Wow cool tags man! I like it a lot. =D

Designer - *March 30, 2015, 8:31 am*

Thanks for the comments all ?

Designer - *April 6, 2015, 4:41 am*

Small update: I changed the stars to match the other 2 sets (better), they're now white with a light shadow.
