Well it all started with me posting in Buyers Bay section, i made a thread that i am looking to buy an account with the rank MG - LEM for around 15\$usd.

After a few minutes i've got an offer. this guy wanted to sell me it for 17\$ i thought that was a alright deal so i jumped right into it.

I sent him money and waited for the acc.

Once i recived the acc info i logged more than happy into it. But once i got in i had to wait for a Steam Guard Code.

Few minutes later there agian i got another message, it was the code.

Well now im signing in, i was so happy and ready for playing csgo. But one thing that confused me when i logged it.

I was like, wtf is this troll.

So i pmed him about it. it could have been a mistake. but it doesnt seem to be it.

Cus after i sent this message i never got a reply. i gave him a chance to reply me within 10 minutes otherwise ill post a scam repport.

Well 10minutes gone, no reply, so i jumped right into the Deal Disputes section to make this scam repport, actually to alert you guys.

I think this guy did this only because im a newbie on this forum, and have no power to attack this guy in any cases.

Here are some picthures & proofs:
