Nice tutorial, blogger is a great tool to use for beginners. However after making some money I recommending moving to hosting and buying a relevant domain to the niche.

I also use tumblr to create landing pages. When it comes to social media traffic, tumblr is a familiar name and often more trusted.

That's one of the best way to start CPA without investment.

You can even rank a Blogger page on Google if your SEO game is good, I've done it before

And if later you wanna buy a domain, a backlink from your Blogger to your Wordpress (for exemple) could be a nice backlink
