Thread: [HTTP/IRC Botnet source thread V1](#)

PolarBeats - March 30, 2015, 4:19 pm

These are sources i have gotten from around the internet and now im giving them out, here is a screen shot of the sources i have available

Spoiler [\(Click to View\)](#)

The only requirement is that you must have positive rep but there may be some acceptations

PM me with the source(s) you want and i will try to get them to you asap also, if you want a botnet source that is not shown above, just include it in your PM and i might have it somewhere on my computer, if i dont then i will try to find it. ?

[click here to PM me](#)

ALSO: a few of the panel sources are encrypted so use with caution as for the builders, i have only ever ran them through wine on linux so i would highly suggest using sandboxie or a vm

Also if this thread is in the wrong section then will someone please let me know or have a mod move it? Thanks ?

Vouch for my boy polar!

He knows his stuff! Hes a really good friend and knows his stop

J?son - July 18, 2015, 1:01 pm

Nice bot pack. I think I have som of the same stuff laying around

I thought this thread died long ago

Also I added more to the pack sence then, I gave it away to a few people but for some reason the staff closed the new thread

FlamingFuryHD - July 18, 2015, 1:47 pm

hahahah good thanks you <3

The Sly - July 18, 2015, 2:12 pm

u should fix ur thread those arent botnet sources du dont have solarbot source lmao

Klaus123 - July 18, 2015, 2:15 pm

Seinturier botnet source code anybody? :)

PolarBeats - July 18, 2015, 2:30 pm

I will in a minute, some have full source and some have compiled builders.

I will only send specific ones if a person requests, id actually prefer if they say what exactly they want.

G1gg1L3s - July 18, 2015, 4:12 pm

You got Load HTTP source or just the cracked builder ?

(Jul 18, 2015 02:15 PM)Klaus123 Wrote: [\[CITE\]](#) Seinturier botnet source code anybody? :) It's really REALLY not worth it. I am still fairly new to c++ and winAPI and trust me, all it is, is code ripped off of carberp and probably some other open source trojan. There are two versions of the panel I could find, the one I got sent was a non functional one where every page of php was the same base64 encoded pile of crap, or the one I managed to recover where I only got half of the pages. But yeah, if you really want the Seinturier source, just go look at carberp lol.

Asp1r3-At0m - July 18, 2015, 4:55 pm

Man, are you sharing all of them in a single pack, or do I have to ask you for just a few?

whatever you want, if you want specific ones just say so, if you want all of them then let me know.

or if you want another botnet that is not listed or you cant find anywhere else then let me know, i have some that where not in the picture.

MuesliChabo - July 18, 2015, 7:16 pm

Cant PM you can you send me it ? pls i need it soo much <3

sorry

No lol you just have the cracked builder source which is missing the header files that are needed to compile.

Anyways PM me with everything you got. ?

PolarBeats - July 19, 2015, 8:45 am

finished sending out PM's, if i missed anyone or if anyone wants it then please PM me

Slavoj Žižek - July 19, 2015, 9:17 am

Just got the Packs and they are really cool, would run in a VM tho Malwarebytes went crazy :D

I have added more then what is in the picture. Mind telling me the names of the "new ones"?

Vector.A+ - August 6, 2015, 12:48 pm

Very Nice big vouch thanks a lot

EmTea - August 6, 2015, 4:28 pm

Hey, I would love to get this pack, but I cannot PM and do not have any rep :((I have had temp accounts on HF before with only little bits of rep). I would understand if you did not want to share the pack with me, but anyway thanks for proving this to people in the first place.

PolarBeats - August 6, 2015, 10:50 pm

just finished sending out PM's if anyone wants this then let me know

Not really, I have periods of time when don't visit the site so my account becomes inactive or I forget a password. I usually use the same handle. Never two at once. :S
