Thread: [Hacking Schools Computers](#)

Thefishdoctor - March 31, 2015, 7:35 pm

Hi!

I'm heading to school tomorrow (high school) and I was wondering if there was any way I can hack the schools computers. I'm always in the library doing work and it gets boring after a while so I just look up tutorials on how to hack school computers. All I really want to know is how to get passwords from people. I tried using Cain and able but that didn't work.

If anyone can give any suggestions on how to get passwords from students/teachers that would mean a lot! (sorry for shitty post)

Billie Joe Armstrong - March 31, 2015, 7:43 pm

How about you Dox them? It would not be 100% accurate but you might wanna give it a try.

Thefishdoctor - March 31, 2015, 7:48 pm

^^ I'll give it a shot thanks! If anyone has any other suggestions feel free to let me know!

SourMan - March 31, 2015, 7:50 pm

This is a crime. If you don't know what your doing you can get in serious trouble, especially if your on a Canadian school board system..

However you answer your question, you can install a keylogger or rat on the school computers. but like i said, very dangerous

Comedic - March 31, 2015, 10:47 pm

Seriously don't try anything that you've never done before especially if you're on their network. Consider using google or the search button on hf.

System32 - April 2, 2015, 6:16 pm

Don't but if you must the only thing i can think of is keyloggers or you could maybe use a video recorder that is completely separate from the computer(such as what someone would use to record video games on a console)

matej203 - April 3, 2015, 8:07 am

It's never good idea to hack school computer, I have experienced it :)

SIM-2502833 - April 3, 2015, 8:23 am

If I were you, rather than actually fucking around with the computers, use an android device to host a MITM attack.

Harder to get caught.

Will be obvious to the netowrk admin that the attack is taking place, but no one will know it's you.

Edit: When you get caught chances are you will be banned on the school network from that phone.

I have successfully hosted many MITM attacks on my school network and have never been caught,

but only ever gotten a couple passwords.

Thehackerguy1 - April 3, 2015, 8:25 am

Hacking into school computers is highly illegal, + schools are managed by the government, you can get suspended from the school, if you're caught bro.

Sace - April 3, 2015, 8:27 am

Agree with most posts here, it is highly illegal and you CAN go to jail if you are caught.

Emily Brontë - April 3, 2015, 8:28 am

Do not do this, they will find you and you will get charges pressed against you with fines.

I think he's referring to the students he wants to hack, not the school. XD

Doesn't matter, anything you do on school network/systems will get you in trouble

Well no shit, and clearly he meant "DoX the kids who he intended to hack through the school system, but do it out of the school system"

You can still get in trouble for that.. I don't get what you mean by "no shit". Gtfoh

ThinkingStars - April 4, 2015, 4:46 pm

lol. never thought it would cause so much problems -.-

Reyah - April 4, 2015, 4:59 pm

I don't recommend hacking school computers man, knew a guy who did that once and got caught, never saw him again >D

MyNan - April 4, 2015, 5:01 pm

I attempted to Rat my school, wasn't safe enough and ended up getting caught. I had an anonymous tip on me, there was no proof it was me. School are government property. Hack the school, governments after you.
