theres so many areas to go for this what are you trying to do?

Ya3goob - April 3, 2015, 11:28 pm

tutorial for what?

If hacking then youtube has lots of it!

There's literally a thousand different things you could do with Kali. You have to search certain terms of what you're trying to accomplish.

If you want to know about a specific tool within Kali, go here.

<http://tools.kali.org/tools-listing>

Select the tool you want, it will explain what it's used for and how to use it. You can also read over a couple books that involve Kali here.

If you want to go more in depth with using a certain tool or whatever, a lot of info and tuts can be found online. Just Google or YouTube for the specific thing you want to do. You can even just search Kali tuts, there is a ton lol. I'm not sure what you want to get into and there is a lot of tools etc within Kali to do different things.
