Thread: [How to prevent my video getting down?](#)

Sheesh - April 4, 2015, 7:41 am

I really need some help guys, my videos are getting deleted within 10 mins, I want them to be up for at least a week. Is there any method to prevent it from getting down?

FormerlyS - April 4, 2015, 7:41 am

Videos on where? YouTube?
Please be specific.

trkah - April 4, 2015, 8:53 am

it depends on the niche and the competition, some stay up longer, some forever, some a little

Your vid on YT will be taken if it's a blackhat niche, including blackhat keywords such as, hack, generator, keygen, etc. Your vid will be take dw, if u copy other's work and also input your CPA link in the description. Try to switch up the keywords: like rp generator into free riot point giveaway(No hack, gen, spam, fake)...

What you say is true my friend, but there are tools designed to find shady links and report videos instantly. Even if it's a legit link, your video is always on the run to be deleted when it hits first page. If you don't make back your investment then don't use that niche anymore.

Batcard - April 5, 2015, 2:37 am

Are you recording your own videos or are you just ripping them? Make sure you dont have your links shortened in the description, and dont boost it with views instantly, but rather wait for a week and then purchase views.
