I'm looking for an Anonymous email service I can use for business use that doesn't keep logs. If anyone can point me into the right direction it would be greatly appreciated.

I believe www.mail.com would work. Not 100% though.

I use mail.riseup.net

It supposed to be secure, and for now it's look very promising

www.safe-mail.net is a pretty good one. Deep Web drug dealers, assassins, hackers etc. use this.

I personally never used it so I cant say much about that.

Try proton-mail. You'll have to wait a couple weeks for it, but I believe it is the best. I personally love it.

safe-mail.net is pretty good. I have not used it personally, but i have heard great things about it.
