Thread: [\[Janus\] SQLi challenge #12](#)

JaNuS18 - April 4, 2015, 3:28 pm

~ Tasks ~

- display version with your name, database and user
- display TOP 3 tables by records count in primary database

~ Target ~

aHR0cDovL3d3dy5ib29zdHVwLmNvbS5hdS9pdGVtLnBocD9pZD0x

(Base64 decode it using online decoder like <https://www.base64decode.org/>)

~ Proof ~

[img]http://img11.hostingpics.net/pics/919307challenge12.jpg[/img]

~ Rules (edited) ~

- use union select with DIOS (no group_concat, substring_index or find_in_set in your syntax)
- use only SQL, no javascript
- don't manipulate output after DIOS
- your injection should work without knowing anything about databases/tables/records on that site
- don't ask for hints or solution

Post your syntax to <https://privnote.com> (it is automatically destroyed after reading) and send me link to PM

Let's SQL knowledge be with you ?

~ Solvers ~

- Shafoon
- iHacker-n00b
- Ryuga
- Kashmiri_Wolf

Edit:

Site is not vulnerable any more... Closed!

Try also my other challenges for advanced injectors: ?

<https://imgur.com/3N5hJSf>

Double query also possible

JaNuS18 - April 17, 2015, 10:14 am

Sure ?

but you should follow the rules and tasks ?

Kashmiri Hunter - May 5, 2016, 11:39 am

Master Site is no more vulnerable !
what to do now ? Master

techguyresearcher - May 5, 2016, 12:44 pm

Thanks For The Challenge..
?

JaNuS18 - May 5, 2016, 1:41 pm

(May 5, 2016 12:44 PM)Mohammad Shafoon Ahangar Wrote: [\[CITE\]](#) Thanks For The Challenge..
?

Please see the rules: TOP 3 tables by records count. Not just first three tables...

techguyresearcher - May 5, 2016, 9:41 pm

U Want Me To PRINT FIRST 3 TABLES HAVING HIGHEST REC IN IT (table_rows)???
Waitn for u reply?

JaNuS18 - May 5, 2016, 11:48 pm

Yes.

TOP 3 tables by records count = three tables with most records - see my proof picture (picture was taken for other site as yours)

techguyresearcher - May 6, 2016, 1:52 am

ty ?

Kashmiri Hunter - May 6, 2016, 2:20 am

ShafOon I hope Now It Will Be Accepted !

JaNuS18 - May 6, 2016, 2:56 am

(May 6, 2016 01:52 AM)Mohammad Shafoon Ahangar Wrote: [\[CITE\]](#) ty ?

Send me your syntax (again). I can't read it. See PM

P.S.

I see from your picture you are using same trick again as in your previous post. Can you do it without special characters like \$ and loc strategy... (you know what I am saying... ?)

Edit:

solver added: ShafOon ?

You solved it with string manipulation after DIOS. But as that manipulation and extra characters for your help wasn't prohibited in rules, I accept your solution.

Congrats ?

Not sure if you are trolling or...

Read all SQLi tutorials you'll find around and you will be familiar with them...

Start reading tutorials mentioned here:

<https://hackforums.net/showthread.php?tid=2008347>

For advanced techniques read [benzi](#)'s tutorials or tutorials at www.securityidiots.com

Kushal - May 6, 2016, 7:39 am

Not trolling but wan to learn.Well i am not advance injector as i am with sqli by 2 months.

But if you guide me i can become advance injector.

By the way thanks for those links. Once i finished those links then i come to you to learn more. :D
