Thread: [Thread Design Template. Red/Black](#)

Lil Durk - April 5, 2015, 12:18 pm

I wasn't very satisfied with this while making it, so I'm basically just giving it away.
Make sure you change the white orbs to actual Icons.
Post on here then, PM me for the design.

This seems bland.

Are you intentionally leaving the sides of the banner out?

There are many things wrong in my eyes with this.

It's a PSD, so if you want you can just fix it.

Not here for critiques.

Yeah I started with half ones.

Then I said fuck it and did a full one for the better package.

All they have to do is drag two layers over to make them full.

The "Buy Now" button would look better if it had a nice red border.

Other than that it looks like a pretty solid design, good job.
