Netwørk's Mini-Feedback Thread

My Story / Introduction

Well as you all may know I am known as Netwørk, and quite a few other aliases. I first joined HackForums 12-27-2014 and I was so impressed by the activity and quality of the site I decided to upgrade my account to L33T day one, I may not have been one of the best members of the community and I know that I may not also be liked by everyone of the community but I have improved myself, such as my grammar and point of attitude since then and have pushed myself to be a better member of HF. In early 2015 I decided it was time for yet another upgrade so I have purchased Ub3r to show my support and dedication towards the HF community, and to this day HackForums and every user on it has inspired me to continue forward with my real life goals.

Theme & Layout

Well firstly I would like to start out by giving some feedback on the site's layout and theme, personally I really like it it is one of the best MyBB Theme's I have seen. It is very clean and professional, and it seems like it has also caught other users attention. The only thing I really don't like about this theme would have to be the classic postbit. I usually use the classic postbit on many sites because its just how I like it displayed but the one here just doesn't seem eye catching for me to use.

Members - Quality & Activity

Secondly I would like to give feedback on the site's Members Quality & Activity, The overall activity seems to be really great, there is at least 1 new member every one or two minutes from what I can see. The quality is also in great condition, there are a few members that post some very LQ things or Spam posts but the staff and administration team members seem to handle them all very quickly when possible.

Community Team

Thirdly I would like to give feedback on the site's Community Team (Admins, Staff, Mentors, etc.). Everyone on the Community Team is doing an excellent job at keeping the forums atmosphere clean and elegant but I would like to see them make more posts and threads in certain areas of the forum.

Omniscient - The god and soul creator of HackForums, only thing I can say about you is that you have done an amazing job at managing the site and its dozens of features.

Factor8™ - a.k.a the 'Reaper', the person who holds the power to banish stolen accounts, does a great job at it too, keep it up ?

Xch4ng3 - Always thought you were a chill guy, would love to have some great discussions with you sometime.

Notable Member Shoutouts

@? MD5 ?

@Programming
