Any chance you guys could help me find some cheap headphones?

The type that stick in your ear. Looking for good quality sound, maybe a lil base effect.

My price range is \$50.

Got a pair of these

They sound really good IMO.

I'm probably going to get some shit for this, but skull candy actually makes pretty good headphones for \$20 - \$50

I'm using Klipsch S4 and I love them. Bass is good but not overpowered like others. You might want to check them out, also you should be able to find them for under \$50 on ebay (normally the price is higher).

I ended up getting these.

Thank you.
