About

Program lets you access HackForums with a VPN.

Its a simple program made in vb.net

15 lines of code.?

How To Use

Run As Admin

Press The Big Blue Button

Wait 15 Seconds

Close CMD

And you are done?

Virus-Total Scans

Click to see the scan: [Antivirus Scan](#)

For all those people who will say this is a Virus In Any Way Because of "Gen:Variant.Strictor.79925" Detection Please Check this out???

Spoiler [\(Click to View\)](#)

Here is few screenshots of the code.

Here is a download link of the project files.

Download: [MediaFire](#)

Download Link

Cyrus - April 5, 2015, 9:58 pm

Nice for lazy people.

On the other hand, open CMD

ping hackforums.net

THEN

route add -p 141.101.121.12 192.168.1.1

PRESS ENTER, boom done.

141.101.121.12 = HF's current IP

Btw guys, this just turns the VPN off for HF and uses for everywhere else.

Goodwork anyway OP for the lazy folk.

Root - April 5, 2015, 10:01 pm

Yes but HF jumps through IP's Every 5 Minute

There are 5 IP's that HF uses.

This program does the same commend for all 5 IP's? (Apr 5, 2015 09:58 PM)Cyrus Wrote: [\[CITE\]](#)

Robo-cop - April 5, 2015, 10:18 pm

seems like a good job

very well done...

vouch for the guy

Cyrus - April 5, 2015, 10:31 pm

You should edit it to "route add -p" instead of just "route add" that way they will only need to run it once and it will stick.

Steezyy - April 6, 2015, 1:21 am

This is very nice OP, good job. Will download and use this later and test it. Thanks

Well I can do that, will update tomorrow!

?????ll?? - April 6, 2015, 2:21 am

nice!

can i have the download link please?

LEAK F ORUMS JOIN US NOW - April 6, 2015, 2:54 am

A friend of mine got banned for multi-accounting when using an VPN (He only had 1 account). I wouldn't suggest using a VPN (atleast a public/sold vpn) browsing HF.

Root - April 6, 2015, 12:48 pm

Omin Blacked all the Known VPN's out there.

Comedic - April 6, 2015, 6:52 pm

I'll do this in the future. Cool tut OP ?

Root - April 6, 2015, 7:44 pm

ha4x0r - April 6, 2015, 7:47 pm

If a IP is banned on HF how's this going to make it able to be access able?

Headdy - April 7, 2015, 12:36 am

(Apr 6, 2015 07:47 PM)ha4x0r Wrote: [\[CITE\]](#) If a IP is banned on HF how's this going to make it able to be access able?

Not. This is just a program that will allow you to browse HF with your own IP instead of using your VPN connection.

fenrir - April 7, 2015, 6:52 am

Ooo. This is really a lot more convenient. Thanks for release.

ha4x0r - April 7, 2015, 8:36 am

(Apr 7, 2015 12:36 AM)Headdy Wrote: [\[CITE\]](#) Not. This is just a program that will allow you to browse HF with your own IP instead of using your VPN connection.

How about you open Internet Explorer and input HackForums.net on that url tab and enter

You can't access HF with VPN. This program turns off the Vpn for HF only but if you visit other websites Vpn will be on (let's HF see your gateway and ip)

Internet Explorer what's that???

Oooo wait that's the shit mate my Microsoft that no one uses!

xc0der - October 25, 2015, 1:07 am

Nice information i would check in the future

subzero4ever - October 25, 2015, 3:00 pm

can you send to me the download link plz looks cool

??NDY???P?? - October 27, 2015, 5:12 pm

I've tried to route add -p hf once with every possible IP in ipconfig yet no luck. All it does is say i'm IP banned yet i'm not.

1supercooldude - November 7, 2015, 9:53 am

can u do this for other websites as well

/

Daddy???????????? - November 7, 2015, 9:57 am

This is good for all the lazy people who do not want to do it themselves :P.

FourthSeven - November 16, 2015, 5:29 pm

Good idea, but you might get banned.

SkullCracka - *November 17, 2015, 7:56 pm*

This seems pretty cool. Definitely gotta check it out.
