Thread: [Online Money Makers | Recruitment](#)

BotMarket - April 5, 2015, 11:20 pm

Want to start making money online?

After being on Hackforums for a few years it seems like there is a lot of people who just want to make money online. I just want to say it's not that hard, compared to waking up at 6PM and digging a hole for 8 hours, or even doing a 8 hour shift at a IT company.

What are we about?

We are a group of people who are skilled from highly experienced to beginners. Anyone is welcome to join us.

Long as you are respectful to all other members.

If you are just a beginner we will show you the path to start making money online.

You must be willing to put in work online. You may even need to work more than a 8 hour shift, but you will be in the comfort of your home. The more work you do the more your make, it's that simple.

All HF rules apply

I would love to join this group. I am part of another financial group-me where we operate on stock picks and post on stock-tweets. I have a unique set of skills I would like to bring to the group. I am interested in learning other peoples methods, I initially started with amazon affiliate but before I could even get that taken off the ground I got involved in the stock market, then currency trading, and then creating automated trading programs.

It's a big reason why I'm here I would love to join the group if you would have me. I am still trying to get my post count up, but I'm a hard worker and diligent. So you will have to PM me I believe.

I saw one other post here where someone was involved in stocks and another user here had the avatar of Garrosh Hellscream haha. I play wow too, and it's part of my method I am still trying to operate on.

I am also a team player. I will gladly give my time and share what I have and edify/subscribe/promote/backup/vouch.

Iron sharpens Iron.
