Thread: [Whitehat Hacker Wanted!!!](#)

Buckles - April 5, 2015, 11:27 pm

Hi,

I'm looking for a whitehat hacker to hack into a personal computer as a challenge. The purpose is not to do any harm, steal or manipulate information, but only to show that it can be done.

By the way because it's a challenge the owner of the computer is aware that there may be attempts.

Anyone interested please contact me and tell me your rate. If this is in the wrong forum I apologize in advance.

Since this involves hacking into a "personal computer", this is the wrong section, because this is "Website and Forum Hacking"

Well it does it count if it will involve hacking into an email? I don't understand why I received a negative reputation for posting a thread. It makes no sense.

??0d????g (55)

Negative (-3): Hacked your rep instead , is it ok?
