basically I need to know one thing...

If I make a new paypal with a whores name can I accept \$ if im in uk how does it work? because people have said they paid and sent proof but it doesn't appear in my transactions so should I add a new currency or is it because its not a verified paypal???

They didn't pay then, you don't have to do anything.

Actually the same things happened to me a few (10-15) times. Add the currency, add every currency you think you might get paid in, AUD, GBP, USD, euro.

This fixed the problem, atleast for me. I was only receiving the emails, informing me that someone sent me money, but it wasn't in my balance. No problems after I added every currency.

IT'S FAKE..... they have paid one time and take screenshot...

Then they photoshop the picture many times.

they say you will received the money within 24 hour righth??

Its all bullshit do not trust is fake.??
