Content : 7.5/10

The content of the ebook is intersting if you didn't started a business. The ebook is in fact a lot of tips to start a business, but some tips are for beginners if I can say that. However, everything is well organized and a lot of ideas are given to start your business. You are linked to some HF threads as well, which will greatly help you. If you read, and start to work you will easily make a lucrative business. And note that it'll work for other forums or others sites! To conclude, I'd say that it's a great guide, but not as in-depth as I thought.

Layout & grammar: 9/10

They layout really caught my eye (I don't give it attention usually).Some images and quotations are added, and even some tables. The grammar is really good, I didn't saw any mistakes.

Conclusion : 8/10

I think this is really worth your money if you never start a business online, and you want tome help. The guide will help you with tips, but don't go as in-depth as I thought. I already had a business before, this can alterate my judgment. The eBook, and the author have my vouch !

Today I will be writing a small yet conclusive review regarding Enterprise the eBook.

Content Rating: 8.5/10

Reason: Unlike many ebooks sold on HF telling you how to make millions a day using this hardcore unsaturated method, this ebook gives you an explanation as to how to make money from building online businesses! (I'm not leaking it by saying that, because the eBook is very well written, and includes more detail than that)

Grammar and Spelling Rating: 9/10

Reason: Couldn't spot any spelling mistakes and the grammar used within the book seems up to scratch. Not much more to say on this one.

Final Rating: 9/10

Reason: This eBook is a lot more original then 99% of eBook's on HF. This eBook is showing a better method for making money and it will work for anyone. Unlike the ones telling you how to make \$5000000 with adfly every month this one is subtle and realistic.

Additional Comments: This ebook is worth buying for noob's towards marketing products and services online.

He's saying that you're inexperienced to suddenly write an entire ebook about starting a "business" here, which is completely right.

This is your first marketplace thread. The only time I've ever actually seen your name is when you were asking what "coding" language you should learn. I've never seen you in the marketplace before today.

I actually have a feeling that this ebook will bring more of those classic skiddy one month operating "companies" here, wont it?
