Thread: [New Graphics Shop Thread Design](#)

Designer - April 8, 2015, 11:25 am

Hey everyone,

I decided to relaunch my graphics shop with a brand new design.
I'll most likely tweak some things along the way, but here it is:

Clouds are a saturated concept, not liking the use of it and I don't think it's necessary

<http://prntscr.com/6r9mwm> -- little inconsistencies like this bother me so much and usually they're the first thing I notice

I'd have to disagree, but I do appreciate your opinion on that design choice.

That's an error on my part, I fixed it. Thank you.

looks great. Nice, clean and simple.

Just the way I like it. It's clean, elegant, simple and straight to the point. I couldn't notice anything bad on it to be honest.

I'd give it a straight 10. :)

Like it cause it is a bit different from all the other thread designs out there now.

Artist has a somewhat similar design imo, not really same

The web designs and thread designs under portfolio look very similar i was confused by this when i first saw your thread.everything else is good!

Your margins are inconsistent, which is really annoying. The swish under your logo could be done better; it fragments into many pieces under 'Designs' and it just looks messy. Typography of the subheading here doesn't fit either- change it. Most of the icons in your products part are seemingly irrelevant, so I would change them. Top/bottom vertical white space looks inconsistent in your Contact and Terms boxes, which needs fixing up quickly. For reasons of spacing and aesthetics, I would also have the 'Popular' and 'Hot' tags in your products hang inside their boxes, rather than outside them.

Good stuff otherwise.

Gorgeous design, you definitely deserve that graphic guru award. Keep up the good work.

Alright. The hole thread itself is a bit hard to read. Or rather its hard to find the borders from topic to topic without searching for them. Cant tell in details why. Maybe because of the mass of different colors.

Anyway. The parts itself are looking very very nice. I like that barly visible backgrounds on your services-tab a lot. Not to mention the icons. Dunno if you did them by urself (guess so) or you just downloaded them... the mix of components is cool.

The only thing is the readability. Maybe you should pick a fixed color-theme (away from black) for the headers of your topics? With fixed readability I guess I would rate this being perfect. :)
