Thread: [What are the best sources on where I can learn all about Java Instrumentation?](#)

Psycho_HF - April 8, 2015, 5:25 pm

I am in need of injecting my Java code into other Java programs. I searched it up and found Instrumentation, but I am not understanding it very well.

If anybody knows any good sources on where to learn and do Instrumentation, please link them to me.

Thank-you.

<http://download.forge.objectweb.org/asm/asm4-guide.pdf>

and

<http://download.forge.objectweb.org/asm/>

you can also use BCEL, but ASM is better

and the jvm specs

<http://docs.oracle.com/javase/specs/jvms/se8/jvms8.pdf>

^ contains jvm instructions sets, its structure, etc

Thank-you very much for supplying the tools, but do you happen to have any tutorials on actually generally setting up Instrumentation and such? Thanks.
