Thread: [Website hits](#)

Trenchguns - April 9, 2015, 3:28 pm

To clear up done confusion, this isn't a ddos service, it's website traffic, like visitors and what not. You can use this to increase rankings.

I've got some spare traffic from my traffic shop, so I'll send hits for an hour or more to your website of choice. This is form Hitleap. If you're lucky, you'll be the last one before I go to bed and you'll get more. 500 hits per hour for however long I keep up your website. 1 person at a time. I'll do this for as long as I have a free slot open.

Simply post your link below.

I would love to have some traffic on my site.

TQ.

Where is the traffic source? Hope OP has a premium account or it's going to actually lower your website ranking.

No problem. Just waiting on an exchange to go through so I can start this up again. Ran out of premium today as well as pp.

Transaction completed. I'll pick up where I left off and I'll do two at a time to try and recover.

First set of people finished. Sent about 3k each. Starting on the next round now.

amg64 - April 11, 2015, 9:39 pm

Thanks buddy got hits around 2-3k. :)

Sorry, wasn't able to continue for a while. My premium ran out and I was waiting for an exchange to go through. You're in the next set of people, don't worry.

Unfortunately I'm not allowed to send hits to pornographic sites.
