Thread: [Hackforums tutorials youtube intro](#)

Mr. Robot - April 10, 2015, 2:49 am

Decided this would be perfect for hackforums. Tried uploading in 1080p but youtube was playing up.

What do you guys think of it?

DECR7PT - April 15, 2015, 8:01 pm

I think that's awesome, tad bit long for my liking though. Can't stand watching the bar move up slowly.. Just like watching a slow torrent download

Mr. Robot - April 15, 2015, 11:59 pm

Thanks man :P I can speed it up for sure or you can just change the fast forward settings on youtube to 1.5x haha

SamcoComplex - April 16, 2015, 6:03 am

I honestly thought this thread would be a tutorial on how to make a youtube intro.
But anyway, that's a sick intro! Good joob!

omyomy - April 16, 2015, 6:36 am

Why it is age restricted ? :)) you should remove that :D

Hash G. - April 16, 2015, 7:01 am

It's hackforums.net. Just saying :P

Overall, it's a ver good vid, great job!

Mr. Robot - April 16, 2015, 3:17 pm

Thanks :D The age restriction thing is a habit XD

Gary - April 16, 2015, 3:18 pm

Just for that I'm going to dislike the video.

Mr. Robot - April 16, 2015, 3:22 pm

Totally fine with me haha its mainly age restricted because I get a tonne of 12 year olds messaging me about helping them make Intros or asking me to make them free ones, which if their content was fine I most likely would.

Gary - April 16, 2015, 3:26 pm

You know a function called unlisted works on YT.

Mr. Robot - April 16, 2015, 3:28 pm

Indeed I do :) lol but thank you for your input.

Astute - *April 16, 2015, 3:29 pm*

Fix the .com and replace it with .net

It'll be perfect then.

Mr. Robot - *April 16, 2015, 3:51 pm*

I don't have rights to the retrievable .net so I have to use .com XD :S
