Thread: [Grand Theft Auto V PC Preorder. - 21GBP - \\$29.28 - 27.66](#)

You MUST use a brazilian VPN if you are not living in brazil. Here is a good chrome extension that will do this for us.

<http://hola.org/>

1. Create an account for the website.
2. Activate the VPN.
3. Add GTA V to your basket.
4. Some people will need to disable the VPN to actually be able to order. If this is the case, just simply disable the VPN, Otherwise proceed with the order.
5. Once you have finished your order, you will get a rockstar social club code. Enter this [here](#). You must be logged into social club.

The key you recieve is NOT region locked. It can be used worldwide.

Enjoy!, Roccat

Can anyone verify this works? I'd like to order, but I wouldn't want to waste 30eur.

I know it looks a little grey, but its fine. Im currently downloading GTA v and its still got another 7 hours. There is no region lock and the game is full english.

DarkestShadow - April 11, 2015, 10:43 am

Be aware, this does not include a Steam key. It is activated on Rockstar Social Club.

frederickjensen - April 11, 2015, 12:34 pm

I can verify this, I pre-ordered many games from this and the site is popular & good!

It works purchased it and activated!HOORAY!

Crocs - April 11, 2015, 4:38 pm

This works, just purchased it and activated it on socialclub. Thank you.

I want it on steam, I'll pass.

I think I'll get this one. The Steam version is 33 euros more expensive! Is that really worth getting it on Steam for?

IMO, no. You can still play singleplayer and online as it's the exact same version of the game. The only difference is if you want other to see that you're playing.

You could even just add it as a non-steam game on steam if you want the overlay.

giantwriting - April 12, 2015, 5:21 am

im getting a 404 error when i try to login :(

Chopped - April 12, 2015, 5:25 am

Not useful to me, already got it, also no steam code. But if people don't mind about no steam code it will be good for them.

I successfully ordered it, but where it says Activation code: it says

"PREORDER-RELEASE 04.14.15

Thanks, as always.

AliveAgain - April 12, 2015, 8:39 pm

I keep getting 404 errors no matter hola or not. Because I login without hola its fine and then I enable hola and add the game to my basket. But then I seemed to be signed out, so when I go to sign in with hola I get a 404 error. No matter what I try nothing works, any help?

Edit: NVM check out this thread: <http://www.neogaf.com/forum/showthread.php?t=1024975>

Use that VPN he links to and it works like a charm.

I guess I save 30 bucks plus I'll just add the game as a non steam game. As everyone will be apart of social club anyways. Do I lose the ability to join games of my steam friends?

Yes,

Hola does not work, for me anyway. I just googled Brazil Vpn and used one that you could download and use for free. Bang, no more 404 message, saved ourselves 30 USD or so, great post OP, and I would up rep alive but I don't know how xD. Thanks for sharing.

You can't as your not upgraded.

My key hasn't shown up yet, it just says "Pré-venda, liberação em 14/04/2015" (Pre-order, release on 04.14.2015) where the key should be. There prolly getting so many orders, wonder how long it will take. They are out I think.

Edit: Received my key now its 1:13 PST.

giantwriting - April 13, 2015, 2:19 am

I Have Now Received My Key :),Thank You

Mater - April 13, 2015, 5:36 am

Hi Frederick,

Once we are only authorized to sell GTA V in South America, we can only grant that the game will work in this region, even if the game may work outside South America. So in order to avoid any issues with region locked, I recommend that you purchase this game on a local store in your country.

Additionally, don't use proxy, VPN or any other ways to avoid the GeoIP restriction applied to the purchase on Nuuvem, because we'll not be able to help you if you experience any problems on redeeming the key due to region locked.

Atenciosamente,

Fabio

Well, since me and many other have already redeemed the key, we wont have problems. This makes the above statement redundant.

Rockstar just sended me an email that they will block all keys that are bought using a VPN and nuuvem doesn't need to refund as we've bypassed their system!

Downloading from Rockstar Social Club now, I'll let you know if its in portuguese in approx. 6 hours ?

I found that the Hola Brazilian VPN wasn't working for me. The Argentinean one however got the job done just fine.

JohnLennon - April 14, 2015, 12:37 pm

Can anyone tell me if I can buy this still, and if it's still the same price?

Rickyh1 - April 14, 2015, 1:41 pm

Works for me. Didn't try to play online, but offline works great. :D

Zedo - April 24, 2015, 12:27 pm

Guys, this is back online but, don't know if you're going to be able to buy it. I tried again and I can't and made new account and tried again, but it says it's not available in my region (because of the paypal). So, if you find a fix, let me know!

I tried a few VPN, and I just cannot get it to work. I think it's also considering your Paypal / Billing Address when giving you the key, so it's a bit tricky.

Yup, wanted to try that, but as you said, tricky. My guess is, the last time this was online they figured out that we were buying the game all over the world and now they have better security for that. We should also be safe because now the keys may really not work in other regions. :(

Alright, I was looking for a cheap key and found a few sites (NON are referral links). Check out G2A below with other sellers on this website for \$39

And here is the other site just be careful, I never purchased from this site:

Steam enforces region locks now, if you buy a Russian version of GTA V you will need to use a VPN everytime in order to launch the game. You may also get banned since it's against the ToS to simulate your location.
