What HackForums Means to Me

Manuscript ([Click to View](#))What HackForums Means to Me

The men that I've seen on HackForums are some of the smartest that I've ever seen. There's so damned much potential here, and yet I see it wasted, everyday. This is an entire generation of guys booting xbox live, coding crypters, and dealing out viruses. What's all this for? Advertising has us chasing cars and sweating for clothes, doing things people hate, things that cause damage to society, to buy shit we honestly don't need. Can you blame us, though? We have no real purpose or place, no great land to go and explore. So we made it! We, the people, made this great area of exploration and adventure called technology and, more importantly, the Internet. This is the next El Dorado! This is the promiseland, gentleman! The City of Gold! The Great American Dream is no more; it is now the Great Technological Reality! And for us, Hack Forums is at the forefront of that!

So we have this great opportunity, this amazing moment in history. We have literally unlimited potential. Now that we're here, it's our responsibility to shine light on the lies that we've been told since we were still sucking on momma!

All of us are consumers. We're all byproducts of a lifestyle obsession over little things that have been sold to us as a huge importance. Beauty magazines, celebrity gossip, televisions with 300 channels. Who's got the nicest car, who's got the hottest wife. Viagra. Rogaine. P90X. Oprah fucking Winfrey. These are the things we're slaves to. Why? Because the world says so! The important things are nothing but a whisper in the wind.

But with HackForums, that's no longer the case.

This is our world now. The world of the electron and the switch; the beauty of the baud. We exist without nationality, skin color, or religious bias. They wage wars, murder, cheat, lie to us and try to make us believe it's for our own good, yet we're the criminals. Yes, I am a criminal. My crime is that of curiosity. I am a hacker, and this is my manifesto. You may stop me, but you can't stop us all.

Hackforums means change. Hackforums is change.

A/N: Credits to the movie Hacker obviously. Hope you guys enjoyed!

Cooligan - April 11, 2015, 10:02 pm

This was interesting that's for sure.

Nice narration Vigor.

Omniscient - April 11, 2015, 10:19 pm

I see it wasted too and this is why China and Russia are winning the cyber wars. Members could work to take their knowledge to a higher level but they just don't seem interested for the most part.

They are content with either trolling or making money off ebooks. I see very few serious coders here.

Thanks for your feedback.

Fudster - April 11, 2015, 10:26 pm

OK. But what is the cyber war? Like What are we fighting for? What is the goal.

Feanor - April 11, 2015, 10:27 pm

It doesn't even work it's got a virus in it j/k thanks for writing this.

Omniscient - April 11, 2015, 10:46 pm

Really?

<http://www.cnn.com/2015/04/07/politics/how-russians-hacked-the-wh/>

<http://www.foxnews.com/tech/2012/10/01/washington-confirms-chinese-hack-attack-on-white-house-computer/>

Both the Russian and Chinese government sanction cyber warfare. The US is falling very far behind when it comes to cyber warfare.

Feanor - April 11, 2015, 11:27 pm

I'm glad you enjoyed it. I wanted to try something different. If only I had a bit of a better voice.

Definitely. And don't get me wrong, there's nothing inherently wrong with making a little bit of money to support their hobbies, but there's so much better they could be doing. We honestly have lots of talent around the forum but nobody takes their talent seriously.

Yeah he sounds pretty nice. I think with some work I could get a better voice. I've been told it's pretty decent otherwise though.
