Thread: [\[NEW\] Spotify Premium Method \[Unsaturated\]](#)

BLCKBRD - April 12, 2015, 2:12 pm

Hi guys,

after the well-known spotify method got patched (at least, it did for me), I decided to go and look for another one, and here it is! If you guys really appreciate this method please let me know and I'll give this thread a better look, for now it'll be a very simple design:

1. Go to <https://member.neteller.com/member/index>, over there you'll have to create an account. I recommend using a real email address (Catch-all address if you own a domain name), because then you can recover your secure ID, which is very important. If you finished your registration you'll end up with a screen which displays your secure ID; copy it, open a new tab and paste it in the address bar so you won't lose it.

2. Now go to view my account --> Net+ Cards and scroll down until you see a green box saying 'Get a virtual card'. Now you'll need to give it a name and enter your secure ID. If you did that, you'll get a virtual CC with no money on it. Now open a new tab and go to the spotify website.

3. On the spotify website you'll have to create a new account, and click 'Start my 30 days trial.' If you aren't located in the UK, choose it as your country in the payment screen and then select CreditCard as your payment method. Now enter the Neteller details and now your account will become premium.

Please bare in mind that you need to re-do these steps for every single account, otherwise it won't work. I know it's a lot of work compared to the other methods, but this one is working for everyone. The only thing I can't guarantee is for how long it will work, as I just found this method a few weeks ago. If you have any questions, contact me.

Kind Regards,
Lokii

You need to enter money in your netteller account for the VCC to work.

.vemla - April 19, 2015, 7:59 am

Thanks for sharing this, OP.

I want to also say that, this similar method works by just using PayPal - I would say it's also much easier method.

What you do, you just choose PayPal as the payment method and you can use a whole new PayPal account, no need to verify or even have money on the PayPal account. However when you get redirected from Spotify to the PayPal site you can just sign into your account and confirm the payment and you should now have completed the payment and get the 30-days trial of Spotify Premium.

Just make sure to cancel the subscription on your Spotify account, and if I'm not wrong, you're only able to confirm the purchase 5 times with the same PayPal account.

Best regards, -3Q-.

On the website follow the instructions the OP posted, and you should see a big button that says
"GET CARD" or whatever, and it'll give you a virtual card that you put the details for in.

No, when you sign up for spotify, it says it's the 3 month trial for 99cents, but the signup button says
"Start free trial" after you put in your CC details. Trust me, it works.

I went to the account tab, subscriptions, and added the subscription for 3 months @ 99cents, the "sign up" button said "Start free trial". It doesn't matter what country we're from, we're telling them we're from the UK. Pick UK as the country, and put in the details from net+, and it'll work.

2. Now go to view my account --> Net+ Cards and scroll down until you see a green box saying 'Get a virtual card'. Now you'll need to give it a name and enter your secure ID. If you did that, you'll get a virtual CC with no money on it. Now open a new tab and go to the spotify website.

3. On the spotify website you'll have to create a new account, and click 'Start my 30 days trial.' If you aren't located in the UK, choose it as your country in the payment screen and then select CreditCard as your payment method. Now enter the Neteller details and now your account will become premium.

Please bare in mind that you need to re-do these steps for every single account, otherwise it won't work. I know it's a lot of work compared to the other methods, but this one is working for everyone. The only thing I can't guarantee is for how long it will work, as I just found this method a few weeks ago. If you have any questions, contact me.

Kind Regards,
