Thread: [\[PREVIEW\] Proper Dropper 2.0](#)

Dutch_Apple - April 12, 2015, 4:33 pm

Hey members of HF,

Don't know if anyone remembers, I posted Proper Dropper 1.0 some time ago now :P
[Proper Dropper 1.0](#)

Just thought i'd post a preview of Proper Dropper 2.0 since i've been making the GUI today, reviews and suggestions for features and ideas would be nice.

List of possible/upcoming features

- Built-In Scanner

- Encrypt downloaded files

- USB Drive spreader

- Semi-USG (only basic)

- Auto-update for downloaded files

- Multiple files (Up to 5 at the moment, but can be changed)

- Try to stay below 4/64 detections at all times (we will see how that goes)

- Antis (Sandboxie, VMware, VirtualBox, Wireshark etc..) (Hopefully)

- Disabling options (Taskmgr, control panel, Regedit etc..) (Requires admin)

Thanks,

Dutch_apple

Would really appreciate some feedback and ideas

Thanks

This looks like a great gui, glad you're still updating this. My suggestion would be to add a inbuilt scanner so they can see you're dropper is fud.

Dutch_Apple - April 13, 2015, 5:14 am

Thanks for the suggestion, I'll see what I can do :)

Not sure if there are any that I can implement for free that don't distribute :p

I'll have a look, if anyone knows of any do let me know
