-More to come PLEASE REQUEST, I will literally buy a server simply because you want an IP in that location.

Frequently Asked Questions:

([Click to View](#))

Q: When I connect to the VPN I cannot connect to any websites?

A:

<http://superuser.com/questions/313921/why-does-connecting-to-my-work-vpn-cause-my-internet-to-not-work>

More coming soon.....

Terms of Service

-Do not abuse our services.

-Do not dispute payment, If you have issues we will either a. Fix them, or b. Refund you fully.

-CoreGuard VPN Solutions is not responsible for anything of which you choose to do while within connection of our servers.

Let me know if I missed anything guys thank you for showing interest.

Demoralise - April 13, 2015, 4:15 am

Sent you a PM with my Skype. Can the DDoS protection handle 500Gbps, also does this support PPTP and OpenVPN server connection on multiple devices such as phones, laptops and tablets?

Mr. Gotti - April 13, 2015, 8:38 am

(Apr 13, 2015 04:15 AM)Demoralise Wrote: [\[CITE\]](#) Sent you a PM with my Skype. Can the DDoS protection handle 500Gbps, also does this support PPTP and OpenVPN server connection on multiple devices such as phones, laptops and tablets?

I do believe the ddos protection currently only handles around 100GBps?

Yes this is PPTP and will work on all devices which support PPTP.

UPDATE: We now have autobuy for 2 of the items we offer. We will be adding the rest later today. ?

NJKL - April 13, 2015, 8:40 am

No vouch copies available? Nice work!

Mr. Gotti - April 13, 2015, 4:21 pm

(Apr 13, 2015 08:40 AM)NJKL Wrote: [\[CITE\]](#) No vouch copies available? Nice work!

Not at the moment, I may do a giveaway type deal here shortly. Thank you, I have a lot of work to do on the thread I just wanted to get it out last night.

UPDATE: We have just launched the website @ <http://coreguardvpn.com/> check it out!

Angel Beats?? - April 13, 2015, 4:36 pm

So you have netherlands and ca speedtests but neither of those are your locations. Wtf

Mr. Gotti - April 13, 2015, 4:51 pm

(Apr 13, 2015 04:36 PM)Ang?l Beats Wrote: [\[CITE\]](#) So you have netherlands and ca speedtests but neither of those are your locations. Wtf

The netherland was not tested, The server that was tested I just recently lost due to time ran out on it and it was not cost effective, I will be getting the Netherland speedtest here for you in about 10 minutes. ?

I did not come to your thread trying to pick it apart so please leave mine alone ;).

PS Amsterdam is in NL you dumbass.

Angel Beats?? - April 14, 2015, 2:01 am

I am the dumbass am I?

Locations Available currently:

- UK
- US
- New Zelend

Shows ca and nl speed tests.

corky12831 - April 14, 2015, 4:27 am

Vouching great product great guy :) nice work

Mr. Gotti - April 14, 2015, 9:11 am

Live Chat Support is now active on the site, We now have twitter so follow us for updates on servers and what not @coreguardvpn

ThePenumbra - April 14, 2015, 9:16 am

puu.sh/hdMv4/66e1176d3b.jpg

Either those speed results aren't from your vpns or you're an idiot.

Mr. Gotti - April 14, 2015, 9:18 am

Really I am an idiot ok I will take 3 seperate ones back to back. What makes me an idiot? OMG People know my supplier of my servers OMFG. Which btw that isn't even the provider.

ThePenumbra - April 14, 2015, 9:21 am

That's from your picture.

OVH lmao.

If anyone wanted to use ovh, they could just buy a vps for 3\$ per month or whatever it is and have a personal vpn.

Mr. Gotti - April 14, 2015, 9:24 am

That is 100% correct sir, However they cannot manage around 5-10 servers with selection of location and management of all the servers by themselves. IF they want to let them be my guest for the amount of money I charge. Also, That is ONE of my servers from ONE company, so I dont understand what the issue is, I have servers that cost the upwards of 40\$. Whats your fucking point?

I am the idiot yet you are searching through VPN threads. For what more than to troll? i'm sure that is the only reason you are here.

Gtfo my thread idiot. Anyone here knows they can make their own vpn. Thanks for the kiddo.

53732 - April 15, 2015, 9:19 am

Vouch:

In my on-going journey to compile a comprehensive list of VPNs hosted by hackforums users and other high quality providers, I came across CoreGuard. It was rather tough to find backers willing to give some of their time to help us accurately compile data to form our list. Luckily, Mr. Gotti not only lent his support, but he was the first official backer of the project. In doing so he so kindly gave us Access to his VPN to help accurately log data about its performance, as well as to help benchmark it in regards to other VPNs. While CoreGuard VPN may be lacking in certain features, such as variety in locations and DDoS protection, it consistently ranks high across the board in all categories. The set-up was a breeze using the built in VPN support native to Android phones and Windows PCs. The connection was fast, painless and only featured slight stutters in traffic, while using the VPN I actually got faster speeds than using the straight up wireless connection available on campus. Sometimes by 2-3 mbps. For the money, this is one of the cheapest, if not the cheapest VPN plan. The quality alone is easily worth 1-2 times more than its current asking price, and for these reasons, I'd highly recommend this product to anyone who wants an affordable, hassle free, yet high quality VPN. I'll continue to look for more VPNs to add to the masterlist, yet CoreGuard VPN set the bar sky-high right out of the gate. I'd like to thank Mr. Gotti for the opportunity and his continued support. His dedication to supporting project is only rivaled by the dedication he gives to his customers and VPN.

His allowed use of the connection to the server without OpenVPN allows you to store your credentials on file, so you don't have to worry about forgetting them. (mine was randomly generated so it'd be a bitch to memorize) The direct connection to the server allows for rapid switching of servers to avoid country-wide blocks. The server is located and hosted in the Netherlands, meaning that not only does he not keep logs, but that keeping logs of user activity is illegal and violates multiple privacy laws. This makes it an ideal place to host VPNs. His acceptance of multiple methods of payment and autobuy ensures that even the most privacy conscious crypto-anarchists can buy without much to worry about.

CoreGuard lives up to its name, not only does it protect your browsing from those who wish to snoop, it also guards you from insanely expensive VPNs, and government and ISP intrusion and throttling.

Customer service is superb, you can always expect a quick, courteous reply from Mr. Gotti at reasonable hours, luckily he is rather laid back. The website is a little confusing, and for those used to OpenVPN this may be a bit difficult to set up at first, but after its initial setup, it's painless. You don't even need Administrator privileges to connect to his VPN on a Windows PC.

To conclude, CoreGuard ranks high on privacy, ease of use, and convenience, however I noticed the speeds were not constant and fluctuated a few Mbps, but this may be due to interference on my end. Windows VPN setup is always awkward for those who've never use it, so less tech savvy users may find an issue with it, but for the price not many other VPNs can compete.

I look forward to buying from Mr. Gotti in the future, and his continued backing of my Project.

I look forward to buying from Mr. Gotti in the future, and his continued backing of my Project. Thank you so much sir, We have now decided to downgrade all pricing.

Now all pricing reflects 10GB/s, We have completely gotten rid of our 1GB plans and moved all 10GB/s pricing down to the 1GB plan pricings. I hope users show more interest to our service. Thanks HF. ?

This is a test I just took while on the VPN and testing the server from a NL Speedtest website. I am located in the US so my results would definitley be a lot different then someone closer to the VPN Server.

xNull - April 17, 2015, 4:00 am

You can't beat \$0.89/month. I was pretty impressed with the speed and the support is great. HMA! Pro vpn was having too much downtime. Thanks again and huge vouch!

Mr. Gotti - April 19, 2015, 7:51 pm

Any connection issues recently? PLEASE don't hesitate to contact me, Either via PM <https://hackforums.net/private.php?action=send&uid=923106> or Live chat @ <http://coreguardvpn.com/>

Mr. Gotti - April 21, 2015, 5:14 pm

This market is not for me, I don't see enough business, and that being said I am shutting down. My servers cost to much money to only house few people. GL everyone else :).
