Grammar: 10/10

I did not notice any grammatical errors in this eBook. The author's wording is very easy to understand without complex English to interpret.

Originality: 7.5/10

Because of the way I make money, it's very difficult to remain unbiased in this regard. I have seen this method before, due to the nature of my niche, although I have yet to see this method in eBook format for sale on HF. You may have heard of the monetizing method before, as it involves Bitcoin, but there's still a sense of originality. The author provides a bonus method which I have yet to see before, albeit is slightly more risky. Keep in mind both of these methods provided may require substantial investment to receive an ROI (return on investment).

Ease of Use: 8/10

This eBook is four pages long, including the bonus method. I expected it to be of low quality, but OP easy portrayed all his necessary points and conveyed everything necessary to the reader in the concise eBook text. That being said, is the eBook easy to use? Absolutely. You can start making money in as little as half an hour with this, and can eventually be in semi-auto-pilot with the appropriate practices/techniques as described.

Overall: 8/10

Although I have seen this method monetized online before, I believe it is still unsaturated and easy to use/implement. If you have the capital and drive to make a modest return, I don't see any problems or huge risks involved. Based on the thread description, I believe OP's points are correct, as you can earn upwards of \$20/hour using this eBook. With the sale prices of \$19/\$29 respectively, this is a no brainer as a purchase and can easily be recouped within the first hour of use.

Bottom Line: Would I recommend? Yes.

You might laugh, but \$1000 is pretty reasonable if you do this properly.

You won't get a refund after a week. This takes time to build up. No, it's not building up an account xD. You can be earning good amounts right off the bat under some circumstances, in others it might take longer.

Imfao at your signature....

I can talk to you, and I'll be honest. If your goal at the beginning is to just make back what you paid for the eBook, \$50 is more than enough.

Some buyers decided to take this to the big leagues. Some invested \$300+, and made alot from it very quickly. It really depends on how serious you take it.

If you're going to walk in with \$10, don't expect to get \$500 out. Be realistic.
