I am on hackforums for about 2 months now and everytime I look into the Beginner Hacking/Hacking Tools and Programs section, I see 1/2 thread about people asking for a free Stresser.

There are no free stressers, maybe read another thread about Free Stresser and see the replies before posting another thread about you asking for free stresser.

- [vBooter](#)

- [IP Stresser](#)

There you go, 2 free stressers.

Have a nice day.

?

I geuss this thread is closed, since there are no free stressers.

I geuss this thread is closed, since there are no free stressers. This is the funniest contradicting answer iv seen...

says there are no free stressers, posts two free stressers, says again no stressers...

the two he posted are free in a way more of a trial type of thing that encourages buying soo you can enjoy half working shit or buy something like inboot or xyz...

There's always quezstresser.com, which is a great stresser but sadly it needs some donations to get it started again.

It's a product that i would donate to for sure, but i don't have any money :P
