Wardow - April 14, 2015, 6:20 am

Cryptography Help Desk

Hello dear members of HackForums, here is the Specialists Cryptography Help Desk, you noobies, who don't know how to use a Crypter, who don't know where to scan your crypted files, you can ask any questions you want on this help desk! So what are you waiting for !?

Free Crypter List :

Spoiler [\(Click to View\)](#)

[\[SPECIALISTS\] BosonCrypter Free V2 - Auto Update - Really FUD](#)

[\[FREE\]Aegis Crypter 2015 \[6.3.1 Edition\] FUD \[1/39 \] 2015/4/13](#)

[www.MSIL.pw Cloud Crypter {UD, Direct Link, Instant, Web-Based, FREE,UNLIMITED}](#)

If you coders want your crypter listed here, just kindly post below your thread link.

Where to buy a crypter?

You can look in the [Cryptography and Encryption Market](#)

Where to scan crypted files?

[Majyx Scanner](#)

[Refud.Me Scanner](#)

[VirusCheckMate Free](#)

[FuckingScan.Me](#)

[Check4You.net](#)

[Nodistribute.com](#)

You are thinking about coding your crypter? Let's get some sources! -> [\[NO SURVEY\] Crypter Sources \[VB6, VB.Net, C#, C++\]](#).

Already asked questions :

Nothing for now!

Kill?Muvz - April 14, 2015, 6:25 am

Very well done Wardow, you will probably get spammed haha.

Berserk - April 14, 2015, 6:34 am

Huge vouch for Wardow, he knows what he is doing.

?I??? ??t - April 14, 2015, 7:05 am

i already see the spamm : "how can i add .net support to my autoit crypter ?"
but GL !

Best Regards,

GSOmega

Viktory - April 14, 2015, 9:28 am

I thought this thread was going to be about actual cryptography and not just rat crypters.

:/

N3oNight - April 14, 2015, 9:42 am

(Apr 14, 2015 09:28 AM)Viktory Wrote: [\[CITE\]](#) I thought this thread was going to be about actual cryptography and not just rat crypters.

:/

well Crypters are a part of Cryptography.. ?

Wardow - April 14, 2015, 11:36 am

You can talk about anything about Cryptography as stated in the thread, i am not very experienced into Hash Cracking and all this stuff, but other people from Specialists can answer too :p

DaPiranha - April 14, 2015, 12:56 pm

Vouch for Wardow, legit guy knows what he is doing.

You should also add this section do the thread maybe? :P

[Cryptography, Encryption, and Decryption](#)

Unauthenticated - April 14, 2015, 1:13 pm

Hi any lead where I can start to code up my own crypto locker? Can't find any open source :s

malo1992 - April 14, 2015, 1:33 pm

Friendly offer, thanks a lot!

Do you also answer questions regarding code development of crypters? C/C++ in my case. (Ofc you linked to some sources, but that's not the point)

You may hear from me either way =)

Cheers

(Apr 14, 2015 09:28 AM)Viktory Wrote: [\[CITE\]](#) I thought this thread was going to be about actual cryptography and not just rat crypters.love you for this <3 haha

love you for this <3 haha
I can answer aswell, i am not very experienced in C/C++ but i can try to reply :) !

(Apr 14, 2015 01:13 PM)CriticalMatt's Wrote: [\[CITE\]](#) Hi any lead where I can start to code up my own crypto locker? Can't find any open source :s

The theory of a crypto locker is simple, you have to search files on the disk and encrypt them, you can choose to crypt only .doc files or .txt, it's as your liking.

You wont find sources of CryptoLockers on HF, because it's not allowed.

phackit - April 16, 2015, 9:29 am

Hi, I am building my own crypter (well modding an existing one :").....) I dont really understand where the "encryption" happens. I know its in the stub, but I dont know what code lines are actually the encryption thing. Also, the file wont open without stub.RES . What is this file? Why dont I get it when I save the .vbn in another file? What does it do?

Lord.Baltimore - April 16, 2015, 9:32 am

Good initiative :)
I can also reply about other subject in the crypto domain (not crypter).

Wardow - April 16, 2015, 12:00 pm

In a crypter you have two parts, the Decryption of the PayLoad and the RunPE, so in your stub you should have a Decryption first & the Injection part if it's a runtime crypter.

Send me a screen of what you have or the files you have, and i'll help you for sure.

prometheus452 - April 19, 2015, 3:39 pm

Good crypter and thanks for support check4you.

"I'm owner of the check4you."

Purple Kief - April 20, 2015, 9:18 am

Don't know if I can ask this here , but do you happen to have / know how to use Cryptex Reborn?
If so , do you know the optimal settings for crypting my Nanocore rat client?

Great that you're doing this btw. :)

SIM-1723889 - April 21, 2015, 6:06 am

im currently in a process of looking for a new crypter for my tiny masm32 loader. it must be:

native

supports x64

not autoit because of its stub size

has a feature that bypasses these dialogues

[img]http://user.hrpro.hk/_/rsrc/1383720795429/support/disable-windows-7-s-open-file---security-warning-dialog-when-running-hrpro-on-network-drive/2013-11-06_14h49_52.jpg[/img]

has a decent binder (not wrar/7z etc sfx ?)

successfully bypasses the avs and remains scantime, runtime fud, of course

has a \$/period plans. im not interested in \$/crypt plans?

thought you can help me to figure out what are the best options currently available at the market so i can make a right choice among them. thanks ?

autoit can be small with packers like upx or you use a stupid sfx method like fileguardian(in my opinion its stupid)

crazyycast13 - April 28, 2015, 3:20 am

For one reason or another I wasn't removed from Specialists during by vac ban, so I too can answer most/any questions that I expect will be asked.

That doesn't mean I will be able to answer all questions as I still need to learn more, and if you really want a math question answered, I suggest going to crypto.stackexchange.com

Wardow - April 28, 2015, 6:03 am

Think is possible to by-pass these dialog with a valid code signing (Verisign would be good because it's in the default Windows local valid certificate store.)

Wardow - April 28, 2015, 7:35 am

It do not it just indicate to the user that the file is certified!
