Thread: [Source code to an amazing keylogger \[iSpy Keylogger\] Persistence, RS Pin Logger](#)

Nex+ - April 14, 2015, 10:52 am

Selling the source code to an amazing keylogger, iSpy keylogger. This Keylogger is one of a kind is by far very advanced in the market. I will only be selling the source code, not ownership to the project, however I may sell ownership if you offer me the right amount. Price for this Keylogger will be \$200. I'll be updating this thread later regarding features, etc. Message me if you have any questions.

Kind Regards,
Nex ?

Why would someone buy the source code and not ownership?

They can rebrand it and use it as a reference to resell to make money.
