How to write anything on a paper with Photoshop.

Hey there guys , here is a tutorial by me, regarding how to write something on a piece of paper with Photoshop, i am not very good in making tutorials , so please corporate. To start with we'll need some things, they are listed below.

Photoshop (I am using CS6)

A paper, which you will be writing on.

Good mouse skills.

[HERE](#) is the image i'll be using for the tutorial.

So let us open up Photoshop first

Open up the picture of the paper which you will be writing on.

Then select the "Pencil Tool" , with "2PX" and color as "75% Grey"

After you do so write whatever you want, for example i'll write "HF"

Well, doesn't this look like some shitty paint edit? , now is the time where we will try to make it as realistic as possible.

Alright, now let's open up the "Blur Tool".

After you select the "Blur Tool" rub it all over the text.

As you can see, I've added blur to the "H" , this makes it more realistic. Add as much as blur you want to make it as realistic as possible. Do not add too much.

Now let me add blur to all the text.

And then you are done.

Here is the result

Hope this helped you.

Hey guys i'm sorry if this tutorial is not detailed or LQ, i am trying to improve myself in editing too. 5 pedos actually fell for it.

Thanks for reading, good bye.

LOL write how stupid you are thinking saying "Stupid Christians" is racism when a religion isn't entitled to a specific race

who's the racist.....?

It still looks fake, try using a smaller pencil size because the text doesnt match the size of the border.

Yep, i know, my Photoshop was not letting me put 1 pixel and a better round brush.

Very nice tut OP! But in the final image, it dose look a bit fake.

EDIT: You could also use a touchpad to make it look like your handwriting

very nice i need a signature done for me

MemmentoMori - April 28, 2015, 4:01 pm

Very nice tutorial mate! Good work.
