Thread: [Rat help desk - Portforwarding - Crypting - Testing - Setup - FREE](#)

BahNahNah - April 15, 2015, 8:07 am

Please read through my [Rat setup guide](#) before posting any questions.

Me and my friend [Gustodragon](#) will be answering any questions you need related to ratting. if it is a simple and generic problem, post below so other people can see the answer.

[Portforwarding]

if you need help portforwarding, please include you skype username in you post.

[Crypting]

I will be giving free crypts to upgraded members who are new to the ratting scene.

[Testing]

We have virtual machines ready to test your rat.

[Knowledge base]

for rats, the knowledge we have is inNanocore

DarkComet

Cybergate

luminosity link

[General questions]

Luminosity link

Spoiler [\(Click to View\)](#)

Q) How do i use luminosity link effectively with a crypter?

A) [Refer to this thread.](#)

Q) How do i use the anti-malware feature?

A) [Refer to this thread.](#)

Nanocore

Spoiler [\(Click to View\)](#)

Q) im getting the warning "there is a high number of failed connection attempts to nanocore". What do i do?

A) use a diffrent port.

smallworld - April 15, 2015, 10:14 pm

I setup NJrat yesterday and had someone test my stub. It worked when he tried it, and he also tried

to connecting me to a few slaves he had. Only one would connect. I had someone else test it today and they would not connect to my RAT. Any help is appreciated.

BahNahNah - April 15, 2015, 10:16 pm

Hello whats your skype name? I can help you.

haequitas - April 16, 2015, 3:27 pm

??????

this is my skype: rainer.zufall51

MrKitty871 - April 16, 2015, 4:01 pm

I purchased nanocore a few months back. I use it to control my home Server and a few computers over the internet. And then all of a sudden I opened it one day and none of my clients were popping up. And soon after I get a message saying "there is a high number of failed connection attempts to nanocore". I use the default 9033 port for nanocore so I thought "oh ok, something else must be using this port". So I got a cute little program called "TCPView" to see what programs were using what. And the only program using 9033 was nanocore itself. And I could actually see in the tcpview that my clients were trying to connect, but were not making it through. The port would pop up green and then it would turn red and just disappear. I am 100% sure that no other program is using port 9033. So that's my problem and i would really appreciate any input on it. Thank you,

BahNahNah - April 16, 2015, 4:06 pm

Thank you,

1) i get the "there is a high number of failed connection attempts to nanocore" error when i use a vpn, so if you are using a vpn, change your port to something more unique.

2) check that you are port forwarded and your dns is correctly updated.

3) it could be a stability issue, i recommend backing up your clients on a more stable software until the stability issues get fixed.

?PORNHUB - April 16, 2015, 4:18 pm

I bought Luminosity Rat i would love to know how to use the crypter . Add me on skype anon-leaks if someone successfully help me i'm paying 3 bucks

I am not using a VPN. and I triple checked the port forwards and the dns. so my only option is to wait i suppose?

IEatFood - April 16, 2015, 7:16 pm

Hey could i get you to test my stub please?
skype 'ashpoop1'

smallworld - April 17, 2015, 2:49 am

Vouch for this guy, he is very nice and helpful!

BahNahNah - April 17, 2015, 5:34 pm

If anyone needs a VM test or some setup help, im online ?

Thetacohacker - April 17, 2015, 6:47 pm

Hi bro could you explain me all i need to know im noob so i would like your help

AncilVTwo - April 18, 2015, 6:13 pm

hey my skype is ancil_ can you help me with the portforwarding

krix - April 19, 2015, 12:07 am

hello frd

im trying darkcomet rat everyday

the slave will be connect when im using internal ip address

but with the external ip the rat would not be connect with the darkcomet

i tries everything, plz help me frd

thank you.

AncilVTwo - April 19, 2015, 1:24 pm

this guy helped me so much thank you

Jcole12345 - April 19, 2015, 2:42 pm

Hey, how can I contact you to set it up for me?

Project [] - April 21, 2015, 3:23 pm

Wich is the best miner to use when using LiminosityLink? Your opinion :)

BahNahNah - April 21, 2015, 3:24 pm

(Apr 21, 2015 03:23 PM)PeanutDude Wrote: [\[CITE\]](#) Wich is the best miner to use when using LiminosityLink? Your opinion :)

i use Exodus Miner and it works fine. you can find a tutorial [HERE](#).

RaGe Modz - April 21, 2015, 4:24 pm

Hey. I tried setting up my rat, but I can't seem to port forward correctly. If you can help please add ghostsniper444 on skype.

shadowfire13 - April 21, 2015, 8:41 pm

Just curious, I was wondering, is there any RATs that you think would work without port forwarding?

The internet I have right now is using a shared router, so I do not know if I can port forward with this one yet.

If you want to know, so far I have used Dark Comet RAT, but since I moved I haven't used it since.

M E N A C E - April 21, 2015, 8:42 pm

Thanks, I will check one or two out and see if that works for me. I will check back incase it works or not.

BahNahNah - April 21, 2015, 8:51 pm

Kazybot is a php rat. Check it out.

Edit: Also, you could get 143vpn or ra4wvpn and use that to portfoward.

stts510 - May 13, 2015, 10:40 pm

I have luminositylink and would like to know if there is anyway to use server computer ip address for accessing webpages?

BahNahNah - May 13, 2015, 10:42 pm

(May 13, 2015 10:40 PM)stts510 Wrote: [\[CITE\]](#) I have luminositylink and would like to know if there is anyway to use server computer ip address for accessing webpages?

LuminosityLink does not have this feature, you are looking for Reverse Proxy.

stts510 - May 13, 2015, 11:47 pm

(May 13, 2015 10:42 PM)BahNahNah Wrote: [\[CITE\]](#) LuminosityLink does not have this feature, you are looking for Reverse Proxy.

any free RAT for such feature? A working one of course.

#Skyline - May 14, 2015, 12:07 am

Very nice helpdesk.

I wish you good luck :)

ImVexal - May 23, 2015, 4:50 am

need help port porwarding for dark comet, skype strath-modz

Scorpi0n - May 23, 2015, 10:33 am

I need help getting set up with a dns, I originally used no-ip and have been unable to get duck dns to work, I was wondering if there's any other free dns' I could use, my skype is - HF_Scorpi0n_ .

Thanks for any help.

BahNahNah - May 23, 2015, 3:00 pm

(May 23, 2015 10:33 AM)_Scorpi0n_ Wrote: [\[CITE\]](#) I need help getting set up with a dns, I originally used no-ip and have been unable to get duck dns to work, I was wondering if there's any other free dns' I could use, my skype is - HF_Scorpi0n_ .

Thanks for any help.

try following through the "Making a DNS with freedns" guide on this thread

<https://hackforums.net/showthread.php?tid=4783930>

If you are still having issues, ill try help.

riddickval - May 23, 2015, 7:15 pm

hi bahnahnah.. pls i really need your help in setting up my rat.. I got njRAT and dark comet ..

pls here is my skype michaelogu6 .

Thanks for your kind consideration

Luigi1945 - July 6, 2015, 2:38 am

I am currently attempting to use njRat v0.7d, I have it all set up, the port I am using is open and working, I set up my no-ip thing and build a stub.

I opened the stub, it opened a picture like I wanted it to but it did no connections show up on the manager/console.

BahNahNah - July 6, 2015, 3:46 am

(Jul 6, 2015 02:38 AM)Luigi1945 Wrote: [\[CITE\]](#) I am currently attempting to use njRat v0.7d, I have it all set up, the port I am using is open and working, I set up my no-ip thing and build a stub.

1) Dont use no-ip, use duckdns or freedns.

2) Using your external ip or DNS on your local network may not be supported by your router, try 127.0.0.1
