Thread: [Free but Old & Detected PDF/Doc Exploit.](#)

SIM-2198759 - April 17, 2015, 5:58 am

I have some PDF/.Doc Exploits that im going to give away for free because who doesn't like free shit?

The exploits are coded in python and the output options are:

[*] PDF

[*] DOC

[*] DLL

PDF2883v2.py

[+] CVE-2010-2883 Exploit

[+] Target: Windows XP, Windows Vista, Windows 7 (DEP and ASLR bypass)

[+] Output = DLL

[+] Usage = PDF2883v2.py [input_file.exe] [input_file.pdf] [output.dll]

PDF2883v3.py

[+] CVE-2010-2883 Exploit

[+] Target: Windows XP, Windows Vista, Windows 7 (DEP and ASLR bypass)

[+] Output = PDF

[+] Usage = PDF2883v3.py[input.exe] [output.pdf]

createExploitPDF.py

[+] CVE-2011-2462 Exploit

[+] Works against Adobe Reader 9.4.6 and prior on Windows XP SP3

[+] Usage = createExploitPDF.py <http://example.com/bin/good.exe>

[+] Output = PDF

Office2007/Office2010 just have an automated output, I've looked through the code but don't really trust the file enough to run it.. Maybe people who code python will understand them but i don't.

How to get them? PM Me and ill send you a download link.

As always, i didn't code these exploits, I just wanted to share them.
Enjoy.

Wth, you do realize that you just jumped a thread that is 5 years old with and inactive / banned original poster.
