Thread: [I NEED URGENT BOT- iOS app chart ranking bot](#)

Splatzgame - April 17, 2015, 4:08 pm

Hi Everyone

I'm looking for a professional hacking coder that can reverse engineer Apis from Itunes into a bot. I have a program that does this but it doesn't rank on charts

What I need is you input a URL, it downloads the app over 10,000 times, and then the app appears on iOS App Store chart

Someone that has done this before or has the software will know about this.

I'm looking to either buy the software that's working. I need proof that it's working first and I use escrow for funding and releasing once recieved ONLY. No BitCoin, etc

Or

Someone that knows the algorithm and can fix my code written in c# .net

If anyone knows then please message me or email splatzgame[at]gmail[dot]com

if you want to make 10k fully auth'd itunes accounts ill do this

Splatzgame - April 18, 2015, 1:31 am

I have the ids, just need the bot to do the downloads that count towards chart

That's the hardest bit. The ids are the easiest

I just can't find anyone with that much tech knowledge to know how to do this as its so hard
