Thread: [justsomewebdev | bang for the buck coding](#)

wander is a multi dwc - April 18, 2015, 1:14 am

I'm your 'bang for the buck' Joe. God knows where the 'average' flew to.

Well, tl;dr I want to introduce myself to the designing world and I wanted to consistently prove myself bla bla bla, I want to fill in my portfolio with colorful works.

THAT SAID, I am doing these kind of works (ONLY HTML!!!) :-

Splash pages (\$1)

Homepages (\$2)

psd2html (\$3)

Unreal prices?! The listed works are very cheap because I'm not offering myself yet, as I'm just filling in my portfolio, but hey? Who doesn't want a free Starbuck at the moment?

Only drawback is, first come first serve. Only one client after another ?

You can contact me through PM, we can discuss more from there.

What makes you think I'll cheat you for a buck, two or three? I'm not that desperate, you know. You could always give starters a chance :)

Thanks for hopping into this thread and reading a content, if you're intending on hiring me work a simple work, I am very sure I won't let you (or your heart) down.

im too desperate to get a thread design for this thread D:
