Satoshi Mines Gambling Technique

You will need:

0.011 BTC

Patience.

A brain.

First of all, you will need to start up your mine. To do this, go [here](#). [non-ref link](#)

Then, click on the deposit button ([Click to View](#)) and send the btc to the link that pops up.

When sent, press on "I deposited" and it'll give you the bits, which is the gambling currency.

Now, to the gambling!

Start off by setting the mines to 1, and the bet value to 1000.

Click play, and click on 3-7 random mines, then press cashout.

Repeat this step until you hit a bomb.

When you hit a bomb, repeat the step 1 more time, then step up your value to 10x bet value(in this case, 10000) and press 2-4 times.

Lower the bet value again, and repeat this whole procedure.

Now, this might not be the best technique, but it is the best one I've found so far. I'll be adding more later.

Anyways, good luck with the gambling!

Headwiki - April 18, 2015, 11:59 am

Nice share ?

I know alot of people will hate this since its gambling, but there are some "strategies" that works really well, until one gets to greedy ?

Myself I tend to play 24 mines and stick to one spot. Betting 50, then after ~20 losses I double and from then on I double each 13th loss in a row.

Not guaranteed success, but it work for me.

Its gambling ?

Rubentastic - April 18, 2015, 12:51 pm

Nice share :) I'm trying it now lol. I got \$2 profit in 5 minutes xD pretty fun if you're bored.

System.out.println - April 19, 2015, 3:37 am

Yeah this is not a very good strategy, good luck for the people that try it.

Adrian_82 - April 19, 2015, 4:07 am

Looks pretty fun so far :D

Made ~\$5 ^^

Aliasllias - April 19, 2015, 4:10 am

Will try it later with the \$0.80 BTC I have.

Thanks for the guide!

A bathing ape - April 19, 2015, 4:16 am

I will try this seems like it will work!

#Windows10 - April 19, 2015, 10:34 am

thanks for sharing this method! i want to try it

Equites - April 25, 2015, 9:27 am

When will you realise, the only method to make long term profit from gambling is owning the casino?

woahxx - April 25, 2015, 9:39 am

This does look a little unsecure.

0x00000000 - April 25, 2015, 11:27 am

I've been trying it for a bit now and it 'works' for me until they slap you with the mine on the 10k bet. I don't think it matters what 'method' you use cause for me I always get cleaned out in the end.

wqs123 - May 31, 2015, 1:15 am

Looks amazing. Must try this Sir. Thanks! :)

T0SH1 - May 31, 2015, 1:58 pm

agreed.. i've tried 3 times.. with 0.4 btc 3 times! and always cleaned out in the end.. i think when you winning you must generate new link??

WOL??IE - May 31, 2015, 2:30 pm

Made 0.06128 from 0.011

Won't risk it anymore feels abit unsafe, but thanks :)

And I should have betted more.

!?! ??z? ???? - May 31, 2015, 2:31 pm

I am gonna try this in a few minutes

LeBon - May 31, 2015, 5:16 pm

Will surely try this bro, if it's still up...

Hash G. - August 1, 2015, 7:51 am

Made \$2 with this, it looks like it works but it's a bit risky.

Ki?ds? - August 1, 2015, 8:24 am

Might try this sometime, I had a similar strategy by just doing practice and looking at how it works.

morph - August 1, 2015, 9:05 am

It is, I have another strategy I might release.

Hash G. - August 1, 2015, 10:18 am

Okay, I tried again and lost all :(

Quick tip :

If you lose 1000, bet 10000. And if you lose 10000 DON'T bet 10000 again :(. Go back to 1000 and the normal routine.

BruceWillis - August 1, 2015, 11:14 am

Hey man, this method made me a quick 5\$\$.

Cashing out now before I lose it all.

Thank you!

D3RP - August 1, 2015, 1:43 pm

This strategy is not particularly reliable, the chance of hitting a mine compounds with each click you risk more by doing the multiple clicks after the first loss.
