Thread: [Another question for men](#)

WindowsOS - April 18, 2015, 10:59 pm

Alright so as I said in my last post just for men, at work we talk about crazy shit and take polls. So here goes :)

If you could suck your own dick, would you? And if not, would you ever attempt it just to know whether or not you can?

I personally tried just to see if I could, but... You gotta get it up right? More length. Then your trying and trying but all the struggling makes it get shorter and further away..... Just depressing.

But if I could do it, I wouldn't. Just the attempt to konw lol

Sunlight - April 18, 2015, 11:00 pm

I heard/read somewhere that you have to have a rib missing or something to be able to do it. I could be completely wrong however.

I think some people can do it without removing the rib, it's just that someone famous did it (blanking on the name) so I think that's just a myth, not sure.

Edit: Oh, very nice link lol, just read it is possible!

Probably, a quick google search for something along the lines of "guy sucking his own dick" would probably come up with a few videos and stuff. Whatever floats their boats.

SSROCK - April 18, 2015, 11:15 pm

No way, no offense to people who do it but..

Too gay for me.

WindowsOS - April 18, 2015, 11:26 pm

No offense bro, a couple people I've asked answered the same. Everyone's different lol But though the act may "seem" gay, if your not attracted to the same sex... You're not gay :) What are going to do if you're on your death bed, your wiser and more open to things due to years of growing, and you all of a sudden remember, you don't know for sure if you can do it or not! Try it man! Try it...
