Thread: [\[Tutorial\]Kali Linux LIVE USB Install](#)

Tyler777 - April 19, 2015, 11:06 am

Step 1

You will need to download the following items

[Kali Linux](#)

[UnetBootin](#)

This will require a 4gb+ USB Thumb Drive!

Step 2 start UnetBootin

Select Disk Image the KALI LINUX ISO you downloaded in step 1, You need to select it and make sure it says ISO in 1st drop down box.

DO NOT TOUCH THE PRESERVE FILES ACROSS REBOOTS!! ITS UBUNTU ONLY!

Select USB Drive in Drive Type and select the Correct USB Drive Letter!!! (MAKE SURE YOU CHECK MY COMPUTER TO KNOW ITS RIGHT!!!!)

Make sure your USB is formatted for FAT32!!

Step 3 Hit OK! and Wait for the file to finish the USB install

Step 4 Reboot your computer and hold ESC change boot option to USB and hit Enter you should load into KALI hit any of the options you wish :D

I will add pictures when I get the time. If people are having problems following the tutorial.

This doesn't really belong in this section. There is a section dedicated to linux and even one specifically for Kali; this section is for Advanced Hacking: Pentesting and Forensics..not OS installations
