Thread: [USA/CANADA 100% Legit call spoofing.](#)

Lolnignogs - April 19, 2015, 7:37 pm

I have created properly working US/CA call spoofing. Shows up your contacts caller id name (if the number is saved)

I am working on how to spoof texts US/CA but for now, this is working fine.

Would anyone be interested in this?

It would be a 1 time payment & youd have it unlimited amount of Time with 100% updates (haven't figured a set price)

Will be HWID & net seal protected.

Edit: did not mention. All voice chat is encrypted & can be called from either a phone or computer. Prepaid, Google voice, pinger, etc can be used.

Micheal Brown - April 19, 2015, 7:38 pm

Yes but keep in mind those are usually used for swatting

Lol, I know what I'm doing. All voice chat is encrypted & not logged...

I'm not new to this.

But if I were to sell it, I'd have a disclaimer etc etc

How can i buy this? I'm very interested.

Flaxpicker - April 21, 2015, 2:15 pm

This has been out for almost a year and works in all countries
