What makes you think that there is something new in this pack?

I've seen all of them before.

Nothing new. Just piled abunch of stuff i got from the community and put it into one file for everyone instead of having to spend an hour getting all of them. They are right there in 1 file that takes about 5 minutes.

5 minutes beats an hour. ^ u ^

Where are credits if I may ask? It's the first thing you should have taken care of before releasing the "bunch of stuff". The idea is cool, but you are completely wrong on the way of sharing it.
